Description: CalTrans vehicle sprewed fluid from overpass onto approximatly 70 vehicles parked below belonging to employees of Continental Maritime. CalTrans appraently not doing clean-up to vehicles; Russel McCarthy from Continental Maritime (619)234-8851 X--531 called USCG to report the following after calling both Caltrans & RWQCB-9 and getting either no response or incorrect response. Someone RWQ??? told him to take the vehicles to a carwash.

FINDS:

Registry ID: 110009529484

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110000781501

Environmental Interest/Information System
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

BUMBLE BEE SEAFOODS (Continued) **1000163719**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

SWRMC/SUPSHIP USN, AT BAE SYSTEMS SAN DIEGO SHIP REPAIR (Continued) **1000820614**

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 42848

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 218109

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 18

Waste code: D006

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

PACIFIC SHIP REPAIR AND FABRICATION BAE (Continued) **1008402385**

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Potential Media Affected:	Sediments, Surface water
Potential Contaminants of Concern:	Polychlorinated biphenyls (PCBs), Arsenic, Copper, Lead, Other Metal, Other Petroleum, Polynuclear aromatic hydrocarbons (PAHs), * * CADMIUM, * * MERCURY
Site History:	From 1979 to the present, Southwest Marine, Inc. and its successor BAE Systems have owned and operated a ship repair, alteration, and overhaul facility on approximately 39.6 acres of tidelands property on the eastern waterfront of central San Diego Bay. The facility, currently referred to as BAE Systems San Diego Ship Repair, is located on land leased from the Port District at 2205 East Belt Street, foot of Sampson Street in San Diego, San Diego County, California. Shipyard facilities operated by BAE Systems over the years have included concrete platens used for steel fabrication, two floating dry docks, five piers, and two marine railways. An assortment of waste has been generated at the facility including spent abrasive, paint, rust, petroleum products, marine growth, sanitary waste, and general refuse.

File Location:	Stored electronically as an E-file
Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Polychlorinated biphenyls (PCBs), Copper, Mercury (elemental), Other Metal, Polynuclear aromatic hydrocarbons (PAHs)
Site History:	Discharges of metals and other pollutant2 wastes to San Diego Bay marine sediment and water have resulted in the accumulation of pollutants in bay bottom marine sediment. The contaminated marine sediments are located along the eastern shore of central San Diego Bay and encompass an area extending approximately from the Sampson Street Extension to the northwest and Chollas Creek to the southeast and from the shoreline out to the San Diego Bay main shipping channel

SAN DIEGO BAY SHIPYARD SEDIMENT CLEANUP (Continued) **S109424073**

on the southwest. The Shipyard Sediment Site is located on the eastern shore of central San Diego Bay, approximately one half mile south of the Coronado Bridge and half the total distance into the Bay. The NASSCO and BAE Systems leaseholds, portions of which lie in the Shipyard Sediment Site, are adjacent to each other, have a similar range of water depths, and lie within the same hydrologic and biogeographic area. The Shipyard Sediment Site encompasses the entire 56 water acres of the NASCCO and BAE Systems leaseholds.

Description:	Caller states an air compressor in a building on the wharf released hydraulic fluid due to unknown causes. Caller states approximately three drops leaked to the bay through a crack in the floor. Caller stated the sheen has dissipated. Caller states the concrete under the wharf has been wiped down and plastic placed under the wharf where the crack is to catch any residual amount remaining in the crack.

SAN DIEGO BAY SHIPYARD SEDIMENT CLEANUP (Continued) **S109424073**

vessel USS Green Bay from unknown sources and due to unknown cause. The vessel applied hydrophobic pads, but was unable to pick up any of the sheen. The release is inside of a boomed area. Per NRC: "Caller is reporting an unknown sheen from an unknown source at their facility." Remedial Actions: "Walked the docks and placed a boat in the water to investigate the sheen, tried to place a pad on the sheen but was unsuccessful"

NATIONAL STEEL AND SHIP BUILDING COMPANY BAE SYSTEMS (Continued) **1014922546**

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Waste name: 352

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN

BAE SYSTEMS SAN DIEGO SHIP REPAIR MSD (Continued) **1008402424**

THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005
Waste name: BARIUM

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

SAN DIEGO GAS & ELEC SILVERGATE POW PLT (Continued) **1000110791**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	SLT90053
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	During drilling of a soil boring for the City of San Diego, AMEC Earth and Environmental ruptured an 8-inch underground pipeline that contained unleaded gasoline. The rupture resulted in the immediate discharge of approximately 3,000 gallons of gasoline to the ground and to soil and groundwater.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ELECTRIC GENERATOR

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to

CP KELCO (Continued) **1004676382**

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

RB Case Number: 9UT3218
LOC Case Number: H02375-004
File Location: Local Agency
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: Soil and groundwater assessment and remediation activities have been ongoing at the site since 1992 to address hydrocarbon impacts due to historical fuel releases at the site. There are currently four open site assessment cases with DEH for this site. All information is managed under DEH case # H02375-005. Site assessment activities are ongoing for this site, and joint monitoring with the neighboring Cheveron terminal is being conducted. Please see the Environmental Data tab for additional site specific data. This case has been administratively consolidated with H02375-003, please see H02375-003 for all case information.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CLEANING DYNAMICS/PACIFIC TREATMENT CORP (Continued) **S100232926**

RB Case Number:	9UT132
LOC Case Number:	H01225-001
File Location:	Local Agency
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The site was operated as a gasoline service station between 1946 and 1968. Between 1968 and 1978 several tenants occupied the site including UPS, a dairy business, and an automobile repair trade school. From 1978 to 1985 a marine industrial tank cleaning operation occupied the site which included chemical storage areas, an oil/water separator, a paint booth and a truck washing area. Pacific Treatment occupied the site until 1992 storing and treating hazardous waste. In 1986, two 10,000 gallon and two 4,000 gallon underground storage tanks (USTs) were removed from the site. The USTs were reported installed in 1946 and an apparent release was observed during the UST removal activities. Numerous borings and monitoring wells were installed at the site over the next 20 or so years in attempts to delineate hydrocarbon-impacted soil and groundwater related to the USTs and in an effort to close the Department of Toxic Substances Control (DTSC) case related to past waste treatment activities. An additional 550 gallon waste oil UST was discovered during this work in the northern portion of the site. DTSC granted conditional site closure for the waste treatment portion of the case, but work remained on the fuel UST portion of the site. Site closure was requested on several occasions, citing a stable and degrading LPH plume and that LPH had been removed to the extent practicable by hand bailing. As noted by DEH, excessive amounts of LPH existed at the site, historically over four feet has been observed. Until significant effort has been made to remove LPH, DEH will not consider this site for closure.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

File Location: Local Agency
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Gasoline
Site History: Two underground storage tanks (USTs) and associated piping located within a walled enclosure in the northeastern corner of the BNSF Railyard, an automotive distribution facility in San Diego, California, were removed on February 15, 1991. The single-walled tanks included a 1,760-gallon capacity gasoline UST and a 1,200-gallon capacity gasoline and/or diesel UST. Both tanks had apparently been installed prior to 1960. Five soil samples were collected during the tank and piping removal, as directed by the DEH inspector. Analytical results for the soil samples indicated a maximum concentration of 7,900 milligrams per kilogram (mg/kg) of petroleum hydrocarbons. An abandoned, sand-filled, 2,000-gallon capacity UST was discovered near the eastern property boundary in August 1993 and subsequently removed on September 1, 1993. Soil surrounding the UST had also been impacted by an unauthorized release. The initial investigation in was performed from 1989-1990 and included the drilling and sampling of seven borings and the installation of three groundwater monitoring wells. The maximum

BNSF SAN DIEGO RAILYARD (Continued) **S101301969**

detected concentrations of gasoline and diesel in soil samples collected from the borings were 9,800 and 14,000 mg/kg, respectively. Waste oil was detected at a maximum concentration of 4,200 mg/kg. The maximum detected benzene concentration was 5.8 mg/kg in soil. Free product was observed in one well with an apparent thickness of 3.07 feet. The maximum detected concentrations of dissolved-phase gasoline and benzene were 800 micrograms per liter (g/L) and 15 g/L, respectively. Diesel was not detected in groundwater samples collected from the newly-installed monitoring wells. Four additional monitoring wells were installed in May 1991. Free product was observed in two of the new wells with apparent thicknesses of 0.61 and 0.37 feet. A hydrocarbon sheen was noted in a third well. In July 1992, four additional wells were installed at the site and quarterly monitoring and sampling was initiated. Free product was measured in four of the existing site monitoring wells at a maximum apparent thickness of 2.58 feet. The maximum detected dissolved gasoline and benzene concentrations in the groundwater samples collected from the remaining wells were 20,000 and 4,400 g/L. Diesel was not detected in the groundwater samples. A total of 1,200 cubic yards of impacted soil was removed from the proposed building footprint during expansion of the existing main office building in May and June 1993. Excavation proceeded from the ground surface to the water table at a depth of 15 to 17 feet. Petroleum hydrocarbons were detected in soil samples collected during the removal at concentrations up to 18,000 mg/kg. The excavated soil was stockpiled and treated onsite. Excavation of impacted also occurred within the walled enclosure that had housed the USTs removed in February 1991. The soil removal occurred in July 1998 following the demolition of above-ground fuel storage tank foundations. Diesel was detected in soil samples collected from the excavation at a maximum concentration of 3,400 mg/kg. Approximately 698 tons of diesel-impacted soil were removed to a depth of three feet below ground surface (bgs). The impacted soil was transported to an offsite recycling facility. A passive skimmer system was installed at the site to recover free product that was replaced in August 1998 with a total fluids extraction and remediation system. The system was operated until the second half of 2000 when low recovery levels resulted in modifying the system to include one product-only recovery well. Hand bailing was used to recover product in2004 and 2005 and oil absorbent socks have been subsequently used in wells. The total volume of product removed to date is approximately 799 gallons. Four groundwater monitoring wells were installed at the site in June 2005. One of the wells was installed up-gradient of the former UST area in the northeast

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Type:	Cleanup Program Site
Case Worker:	KK
Local Agency:	SAN DIEGO COUNTY LOP
RB Case Number:	Not reported
File Location:	Local Agency
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Lead, Other Metal, Diesel, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The site property consists of approximately 6.43 acres and encompasses two full blocks bound by National Avenue, Main Street, Cesar Chavez Parkway and the Coronado Bridge Right-of-Way in the City of San Diego. The site was originally acquired by Mercado Alliance LLC and slated for redevelopment with regulatory oversight by the County of San Diego, Department of Environmental Health (DEH), Voluntary Assistance Program (VAP) under case number H39637-001. When remediation and redevelopment plans fell through, the Redevelopment Agency of the City of San Diego took control of the property and subsequently transferred it to Shea Properties for remediation and redevelopment. The proposed site use is slab on grade commercial with residential units above some of the commercial buildings. Remediation activities related to hydrocarbon- and metals-impacted soil were overseen in the VAP under case number H39637-002. This closure addresses both VAP cases, H39637-001 (assessment only) and -002 (assessment and remediation). Due to the size and location of the site, there have been numerous historical land uses, including a wrecking yard, lumber yard, vehicle repair and painting facilities, oil storage and distribution, recycling center, junk yard, etc. Most recently, prior to development, the site was a vacant lot. During the course of remediation activities, three underground storage tanks (USTs), likely associated with historical land uses, were discovered and removed under permit and oversight of the County of San Diego, Department of Environmental Health. The majority of observed soil impacts were related to heavy metals found to be nearly ubiquitous across the site in the upper four feet of soil, likely associated with undocumented fill or other historical land uses. In addition, a number of historical features were identified before and during excavation activities, including in-ground hydraulic lifts, cisterns, debris pits, USTs, etc, which contained undocumented fill (with heavy metals), hydrocarbons, and other volatile organic compounds (VOCs). The majority of these features were generally observed in the upper 12 feet with a few exceptions extending up to 25 feet below grade. Assessment and remediation of these features were conducted concurrently. Concentrations of total petroleum hydrocarbons as gasoline, diesel, and oil in soil were detected up to 53, 690, and 2,700 milligrams per kilogram (mg/kg), respectively. VOCs were largely absent from the site or observed at relatively low concentrations with a few notable exceptions including trichloroethylene (TCE) and 1,2,4-trimethylbenzene at 4.1 and 3.2 mg/kg, respectively. The majority of Title 22 metals were observed above mitigation criteria in one or more locations, including lead, the primary metal constituent of concern, which was observed in soil up to 8,340 mg/kg. Depth to groundwater at the site was observed in a few open boreholes between 32.5 and 39 feet below grade. Groundwater analytical data is limited to a few groundwater samples collected during assessment activities associated with case H39637-001. Only a few chemicals were detected in groundwater above laboratory reporting limits, most notably tetrachloroethene (PCE) and TCE, detected up to

MERCADO DEL BARRIO (Continued) **S110656443**

59 and 600 micrograms per liter, respectively, as well as their associated breakdown products. Cleanup goals for metals-impacted soil located within the construction envelop were based on San Diego Regional Water Quality Control Board Resolution R9-2007-0104, Tier 1 Soil Reuse guidelines utilizing a 90% upper confidence level (UCL). Cleanup goals for hydrocarbon- and VOC-impacted soil were determined to be concentrations below laboratory reporting limits. The majority of soil which exceeded established cleanup goals was stockpiled and reused in the northern portion of the site. Approximately 22,439 cubic yards of impacted soil was consolidated and capped with at least three feel of clean soil. Impacted soil with met

Local Agency:	SAN DIEGO COUNTY LOP
RB Case Number:	Not reported
LOC Case Number:	H15784-001
File Location:	Local Agency
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Gasoline
Site History:	A subsurface investigation was conducted at the site for a real estate transaction, since the property was reported to be occupied by a gasoline service station from the early 1920s to the early 1960s. The investigation included the drilling of 8 shallow borings on March 29, 2010, and five deeper borings on September 7, 2010. The laboratory analytical results indicated that soil had been impacted by total petroleum hydrocarbons (TPH) in both the gasoline and diesel ranges. When the results of the investigation were submitted to the Department of Environmental Health (DEH), an unauthorized release, H15784-001 was opened. Additional site assessment activities were conducted to define the extent of soil contamination and evaluate groundwater conditions at the site. Two additional soil borings were drilled in February 2012, and one groundwater monitoring well was installed. The site vicinity is underlain by the Pleistocene Bay Point Formation, characterized by both marine and non-marine near shore deposits. Based on the investigations, the subsurface soil encountered at the site consisted of silty-sand from the ground surface to approximately 25 feet below ground surface (bgs), underlain by silts and/or clayey-silts to approximately 60 feet bgs. Lenses of poorly graded sand between 10 and 50 feet bgs were encountered at some of the boring locations. The hydrocarbon impacted soil is located between 12 feet bgs and 30 feet bgs at three separate

LUIS COMANJA AUTO SERVICE (Continued) **S104748496**

locations on the north portion of the site near National Avenue. The location of the former tanks and dispensers is unknown. The consultant has estimated there is total of approximately 66 cubic yards of impacted soil greater than 100 mg/kg TPH remaining at the site. The depth of groundwater at the time of the first sampling event on February 27, 2012 was at 48.15 feet bgs. Groundwater at this site is located within a groundwater basin that has been designated as.exempt or having no potential or existing groundwater use. The groundwater flow direction could not be measured, since only one groundwater monitoring was installed. Based on a review of hydrogeologic data from neighboring sites, the groundwater is estimated to flow to the southwest towards San Diego Bay. Results of the groundwater laboratory analytical results showed low concentrations of TPH gasoline, benzene and xylenes. A second groundwater sampling event was conducted on July 11, 2012, and all of the sample analytical results were nondetect. The consultant has recommended no further action based on the low concentrations of contaminants of concern remaining on site. The groundwater investigation has shown there are little or no impacts to groundwater. The building structure existing on site is not located above the soil contamination. This site meets the criteria of a low risk groundwater site. DEH concurs with the consultants recommendation.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code:	D001

PRO-LINE PAINTS COMPANY (Continued) **1000139073**

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004
Waste name: ARSENIC

Waste code: D005
Waste name: BARIUM

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D011
Waste name: SILVER

Waste code: D019
Waste name: CARBON TETRACHLORIDE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING,

PRO-LINE PAINTS COMPANY (Continued) **1000139073**

BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: U002
Waste name: ACETONE (I)

Waste code: U154
Waste name: METHANOL (I)

Registry ID: 110002696636

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

IMS RECYCLING SERVICES INC (Continued) **1000129619**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification:	Large Quantity Generator

Corrective Action Summary:

Event date:	09/09/1991
Event:	CA029ST
Event date:	09/09/1991
Event:	CA049PA
Event date:	09/09/1991
Event:	CA Prioritization, Facility or area was assigned a low corrective action priority.
Event date:	02/11/1992
Event:	Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event date:	02/11/1992
Event:	CA Prioritization, Facility or area was assigned a low corrective action priority.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	9UT3532
LOC Case Number:	H01530-003
File Location:	Local Agency
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	This case was originally opened after gasoline hydrocarbons were detected in soil samples collected during the removal of two underground storage tanks (UST) in August 1997. In 1998, the case was expanded to include an earlier release case H01530-002 from a UST that was removed in October of 1989, and case H01530-002 was administratively closed. A monitoring well (MW1) was installed in the former tank pit in 2002. Less than one-tenth of a foot of free product has been intermittently detected in this well since it was installed, and subsequently removed by bailing. Three additional wells were installed in 2008 and several soil borings have been drilled at the site. Free product has not been detected in any other wells. The soil borings indicated that the free product is limited in extent. The depth to groundwater is approximately 44 feet below ground surface. The concentrations of dissolved phase gasoline constituents outside of the tank pit area have generally been below the maximum contaminant levels with the exception of benzene. In March 2009, benzene was detected in groundwater at 1.05 ug/l in well MW3. The groundwater is designated as non-beneficial use. The nearest surface water body is San Diego Bay, which is greater than 4000 feet away from the site. A Corrective Action Plan was prepared for the site in which the consultant proposed natural attenuation for remediation of the free product. The consultant estimated that 1,667 cubic yards of contaminated soil are present at the site to a depth of approximately 50 feet below ground surface, covering a surface area of approximately 900 square feet. The consultant stated that the contaminated soil does not pose a threat to utilities that are buried at shallow depths (less than 20 feet). A soil vapor survey was conducted that indicated that the soil did not pose an excess cancer risk for vapor intrusion onsite or to neighboring residential properties. The consultant concluded that the free product was limited in extent, had been removed to the extent practical, and did not pose a threat to either human health, safety or the environment. The consultant requested no further action for the site and DEH concurred.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013
Date Made Active in Reports: 01/28/2014
Number of Days to Update: 78

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/25/2013

Next Scheduled EDR Contact: 10/20/2014
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Next Scheduled EDR Contact: 10/20/2014
Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013
Date Data Arrived at EDR: 11/11/2013

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2014
Date Data Arrived at EDR: 03/13/2014
Date Made Active in Reports: 04/09/2014

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2014

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Last EDR Contact: 08/06/2014
Next Scheduled EDR Contact: 11/17/2014
Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/28/2014
Date Data Arrived at EDR: 06/20/2014

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Next Scheduled EDR Contact: 12/22/2014
Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

USGS TOPOGRAPHIC MAP

Target Property Map:	32117-F2 POINT LOMA, CA
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

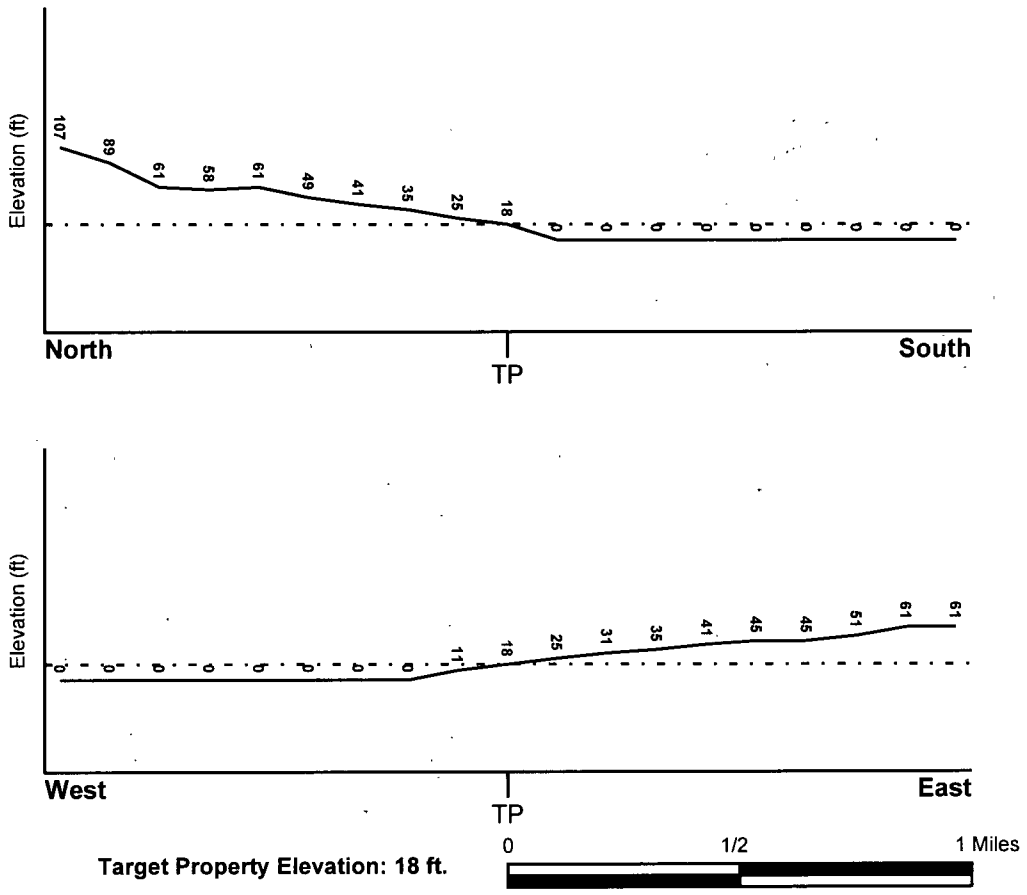
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
SAN DIEGO, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06073C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
POINT LOMA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles ESE
Site Name:	SAN DIEGO NAVAL STATION
Site EPA ID Number:	CA4170090233
Groundwater Flow Direction:	TOWARD AND INTO SAN DIEGO BAY AND PALETA CREEK.
Measured Depth to Water:	approximately 10 feet.
Hydraulic Connection:	The near-surface aquifer is not hydraulically connected to the deeper, usable aquifer. The near-surface aquifer is impacted by salt-water intrusion.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

For additional site information, refer to Physical Setting Source Map Findings.

63732 1881

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

REQUEST TO REVIEW PUBLIC RECORDS FOR THE SITE ASSESSMENT AND MITIGATION (SAM) PROGRAM AND THE HAZARDOUS MATERIALS DIVISION (HMD)

Requestor Name: Adrian Olivares **E-Mail:** aolivares@ninyoandmoore.com

Phone: (858) 576-1000 x 11257 **FAX:** (858) 576-9600

Company Name: Ninyo & Moore

Mailing Address: 5710 Ruffin Road, San Diego, CA 92123
(You may attach a business card/overprint with business card if preferred)

Additional information on public records may be accessed from the DEH website, www.sdcdeh.org. Fax your completed form to the Public Records Program at (858) 505-6848 or attach completed form and e-mail to deh.publicrecords@sdcounty.ca.gov. The following information is required so that our files may be accurately searched. Separate forms are needed for each address or parcel number.

400 East Belt St., San Diego CA 92113 **or** _____
Exact Address (Street, City and Zip Code) Assessor's Parcel Number

Optional information (establishment permit number, business name, etc.):

If you indicate the purpose of your search, it will help us identify all the public records you may wish to review. If you know the program file you want to review, please check below:

☒ Contaminated Property Investigation(s) (SAM Cases)
☒ Hazardous Materials Permit & Underground Storage Tank Files (HMD/UST)
☒ SAM Closure Letter/Report
☐ Other: _____ (specify)

DEH complies fully with the California Public Records Act and the Federal Freedom of Information Act. Every properly completed request will be processed in the order it is received. Some files are on line as indicated below. Photocopies of file items may be requested. **A fee of $.20 per page is charged to cover cost of copies.**

OFFICE USE ONLY BELOW THIS LINE

Files reviewed by: _____ of _____ Date: / /
Files copied for: _____ of _____ Date: / /
Request cancelled by: _____ Date: / /
Photocopies _____ Cost _____ Picked up/mailed on _____ By _____

A search for DEH records checked above has been conducted and the following apply:

☐ SAM files for the permit number(s) below are available. After the files you have requested are retrieved from storage, an appointment will be scheduled so that you may review SAM records in the DEH main office.
_____ # _____ # _____ # _____ # _____

☐ HMD/UST files for the permit number(s) below are available for review at: http://sdcounty.ca.gov/deh/doing_business/hmd_search.html
_____ # _____ # _____ # _____ # _____

☐ Original records were purged. Database-only records are available (at: http://sdcounty.ca.gov/deh/doing_business/hazmat_search.html) for the following permit number(s):
_____ # _____ # _____ # _____ # _____

☐ No SAM/HMD/UST records were found for the address/APN you requested.

SAN DIEGO AIR POLLUTION CONTROL DISTRICT

REQUEST FOR PUBLIC RECORDS

Date: July 21, 2014

Name: Adrian Olivares

Agency: Ninyo & Moore

Address: 5710 Ruffin Road

City: San Diego State: CA Zip: 92123

Phone: (858) 576-1000 ext. Fax: (858) 576-9600

I request to inspect the following Public Records (please be specific): Information on Permits, Notices of Violation, and Emissions for the following facilities:

1) 1691 Melrose Drive San Marcos, CA 92078
2) 1693 Melrose Drive San Marcos, CA 92078

3) 400 East Belt Street, San Diego, CA 92113

INSPECTION OF PUBLIC RECORDS

The district shall make a determination if the records requested are available with the exception of those records specifically exempted from disclosure by state law and those records labeled as "TRADE SECRET" which are not emission data, within ten (10) days of the date of the receipt of the request. If, for good cause, the determination cannot be made within the ten (10) working days, the District will notify the requesting person the reasons for the delay and when the determination is expected to be made within an additional 14 days, as prescribed by law. Those records labeled as "TRADE SECRETS" shall be governed by the procedure set forth in District Rule 177 Section (g).

If you have any questions, please contact Public Records at (858) 586-2618.

Mail or fax completed form to:

San Diego APCD

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

ADHESIVE MATERIAL APPLICATION OPERATION: OUTDOORS, WORKSTATIONS AND ON SHIP BOARD; USING BRUSHES AND ROLLERS FOR MATERIALS APPLICATION, AND SOAP AND WATER SOLUTION FOR CLEANUP OPERATION.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27U] Adhesive Materials Application Station

BEC: 11913

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Permittee shall not use coatings and/or solvents which contain Toxic Air Contaminants (TACS) listed in Rule 1200 (Revision Effective 6/12/96) except toluene.
2. Toluene emissions from this adhesive application operation shall not exceed 201 lbs per consecutive 12-month period. This equates to usage of 183 gallons per consecutive 12-month period of adhesive materials containing 16% by weight toluene.
3. Permittee shall comply with all recordkeeping requirements of Rule 67.21, including, maintaining a current list of all materials used which provides all of the data necessary to evaluate compliance. Daily usage records of each adhesive material used shall be maintained on site. Monthly inventory (dispensing) records for each solvent used as an adhesive bonding agent, or for stripping, surface preparation, or cleaning shall be maintained on-site. These records shall be maintained on-site for three years and made available to the District upon request.
4. Current Material Safety Data Sheets (MSDS) or manufacturer's specifications regarding Volatile Organic Compound (VOC) and/or toxic air contaminant (TAC, see Rule 1200) content shall be maintained on-site for all materials and made readily available to the District upon request. (Rule 67.11, Rule 1200)
5. Total daily emissions of Volatile Organic Compounds (VOC) from this equipment at this stationary source shall not exceed 10 pounds per day.
6. Total emissions of Volatile Organic Compounds (VOC) from all adhesive material application equipment at this stationary source shall not exceed 5 tons in any 12 consecutive months.

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

7. Adhesive materials, adhesive bonding agents, stripping, surface preparation, and cleaning materials used in these adhesives materials application operation shall comply with Rule 67.21 requirements. (Rule 67.21)
8. Permittee shall comply with all recordkeeping requirements of Rule 67.21, including, maintaining a current list of all materials used which provides all of the data necessary to evaluate compliance. Daily usage records of each adhesive material used shall be maintained on site. Monthly inventory (dispensing) records for each solvent used as an adhesive bonding agent, or for stripping, surface preparation, or cleaning shall be maintained on-site. These records shall be maintained on-site for three years and made available to the District upon request.
9. All solvents, materials containing solvents and other materials containing organic compounds shall be stored in closed containers in accordance with Rule 67.17 requirements.
10. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
11. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
12. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

EQUIPMENT DESCRIPTION

1a. Equipment same as described on permit to operate? YES ☒ Yes ☐ No

1b. If no, are changes i.c.w. Rule(s) 10(a) / 10(b)? N/A ☐ Yes ☐ No

Description of changes: _____

2a. Current permit posted / available per Rule 10(c)? YES ☒ Yes ☐ No

2b. Ownership verified? YES ☒ Yes ☐ No

3. Permit conditions reviewed (current / enforceable)? YES ☒ Yes ☐ No

(If no, complete permit condition change request and describe changes in the comments section)

EQUIPMENT INSPECTION

4. Equipment observed in operation? NO ☐ Yes ☒ No

5. Type of substrate: Marine metal

6. Are adhesives applied in a spray booth? NO ☐ Yes ☒ No

If no, state where adhesives are applied: Pier

a. Are booth filters in place and in good condition? N/A ☐ Yes ☐ No ☒ N/A *Rule 21*

b. Are the fans operational? N/A ☐ Yes ☐ No ☒ N/A *Rule 21*

7. VOC materials stored in closed containers? YES ☒ Yes ☐ No *Rule 67.17, 21*

If no, indicate size of containers, content and quantity below:

Size of Container	Contents	Quantity

8. Facility using compliant surface preparation solvents? N/A ☐ Yes ☐ No *Rule 67.21(d)(3)*

a. Mfg. Name / ID#: None VOC Content: ____

b. or Boiling Point: ____ Or Vapor Pressure: ____

APCD Rev. 06/04

9. Facility using a compliant application equipment cleaning solvent? ☒ Yes ☐ No *Rule 67.21(d)(4)*

a. Mfg. Name / ID#: Water/Acetone VOC Content: 0 g/l

b. or Boiling Point: _____ Or Vapor Pressure: _____

State Cleaning method used: spray through gun

10. ADHESIVES

Manufacturer Name / ID#		VOC (Content as applied)	VOC (Standard)	Rule 67.21 compliant adhesive?
ADHESIVE: Natural Dolfinite Bedding Compound 2005		115 g/l	250g/l	YES
Adhesive Category (Per R67.21)	General Adhesive Materials: Architectural Products			
Adhesive Type / VOC Standard (Choose one from either drop down menu)	Contact adhesive - General/250 g/l.			
ADHESIVE: DAP Weldwood (contact cement) (16oz cans)		500 g/l	EXM	YES
Adhesive Category (Per R67.21)				
Adhesive Type (Per R67.21) (Choose one from either drop down menu)

Adhesive Type (Per R67.21) (Choose one from either drop down menu)				

11. Does the facility have a control device? NO ☐ Yes ☒ No *Rule21*

If yes, state the type of control device: _____

a. What are the required operating parameters of the device: N/A

b. Is the control device operating within the specified parameters? N/A ☐ Yes ☐ No *Rule 21*

c. List the operating parameters at the time of inspection: N/A

RECORDKEEPING

12. Facility has a current list of adhesive materials? YES ☒ Yes ☐ No *Rule67.21(d)(1)(i)*
    a. including the category of adhesive material; YES ☒ Yes ☐ No *Rule67.21(d)(1)(i)(A)*
    b. mfg name and ID # for each adhesive material; YES ☒ Yes ☐ No *Rule67.21(d)(1)(i)(B)*
    c. mix ratio of components (where applicable); YES ☒ Yes ☐ No *Rule67.21(d)(1)(i)(C)*
    d. VOC content, vapor pressure: and/or initial boiling point (where applicable). YES ☒ Yes ☐ No *Rule67.21(d)(1)(i)(D)*
13. Facility has current MSDS / product data information from the manufacturer / supplier? YES ☒ Yes ☐ No *Rule 21*
14. Facility keeping daily or monthly records of the amount of each adhesive material used? YES ☒ Yes ☐ No *Rule 67.21(d)(1)(ii), 21*
15. Facility keeping daily records of emission control equipment operating parameters? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.21(d)(2)(ii)*
16. Facility maintaining inspection and maintenance schedules for the control equipment? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.21(d)(2)(ii)*

EMISSION REQUIREMENTS / SOURCE TESTING

17. What is the facility's permitted emission limit? 5 tons/ 12 mths, 10 lbs/day
18. Is the facility exceeding the permitted emission limit? ☒ Yes ☐ No *Rule 21*
    If yes, state the number of days the facility exceeded the emission limit:
19. Indicate the facility usage of:
    a. Adhesives: 2013: 0.75 gallons YTD
    b. Solvents:
    c. Cleaning Solvents:
20. Is the facility required to be source tested? NO ☐ Yes ☒ No *Rule 21*
    If yes, state the source test frequency and the results of the last source test:

COMPLIANCE ACTIONS

21. Notice to Comply Issued? NO ☐ Yes ☒ No Document No.

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

SOLVENT RECOVERY PROCESS, CONSISTING OF: ONE (1) CB MILLS MICRO STILL USED TO RECOVER SOLVENTS. 983382(ABG)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [44B] Solvent Recovery Still

BEC: 13228

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Air pollution control equipment shall be maintained in good operating condition and shall be in full operation in accordance with manufacturer's instructions at all times when the process equipment is in operation. The manufacturer's instructions shall be maintained on site and made available to the District upon request.
2. All materials containing volatile organic compounds shall be stored in closed containers in accordance with Rule 67.17 requirements. (Rule 67.17)
3. At no time shall the subject equipment cause or contribute to a public nuisance as specified in District Rule 51. If compliance with Rule 51 cannot be demonstrated to the satisfaction of the District, the permittee will take whatever corrective action necessary to meet applicable requirements. If corrective action requires any physical change or modification to the subject equipment the permittee shall apply for and obtain an Authority to Construct for all such modifications prior to making any physical change. (Rule 51)
4. Permittee shall comply with all applicable requirements in Rule 66.1 (Rule 66.1)
5. Permittee shall operate and maintain the equipment described above in accordance with the manufacturer's instructions and the drawings and descriptions submitted for this permit except as otherwise specified by this permit. Manufacturer's instructions shall be made available to District personnel upon request.
6. Emission of volatile organic compounds (VOC) from the above emission unit shall not exceed 10 pounds per day. For the purposes of this condition, 3.3 lbs of VOC emissions are released per ton of VOC containing material processed. (Rule 20.2)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

DIESEL ENGINE, DETROIT DIESEL MODEL 16V-149TI, #2 DIESEL OIL FUELED, LOCATED IN ENGINE #1 FLOATING DRY DOCK, S/N 16E0007583, ENGINE POWER SPOSD #1. (APP #930850 EAD 7/18/95) 976428AFS 29 OCT 2002

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [34D] Engine for Non-Emergency & Non-Cogeneration

BEC: 12302

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The engine hour meter shall be maintained in good working order and used for recording operating hours in the daily log. The compliance section at the District shall be notified prior to an hour meter replacement.
2. Fuel samples may be obtained from the site by District personnel at anytime for analysis, at the permittee's expense, to determine compliance with fuel quality requirements.
3. Operation of this engine shall not exceed 1000 hours per 12 consecutive month period.
4. A log showing hours of operations shall be maintained on the premises for at least two (2) years and be made readily available for inspection by the District upon request. Log entries shall be made on a daily basis when the engine is operated.
5. This engine shall use only California vehicular diesel fuel. Records of California Diesel Fuel Certification shall be maintained on-site and made available to District personnel upon request.
6. Rule 50-visible emission limits: Air contaminant emissions shall not be more dense than 20% (or number 1 on Ringelmann chart) for more than three (3) minutes in any consecutive 60 minute period. Crankcase smoke shall also be in compliance with Rule 50.
7. Rule 51-public nuisance: Equipment shall not cause or contribute to public nuisance.
8. The owner or operator of each engine shall conduct periodic inspections of each engine and add-on control equipment to ensure that each engine is operated in compliance. Inspections shall be conducted at least once every 4,000 hours of operation, or every six months, whichever occurs first.

9. The owner or operator shall conduct periodic maintenance of each engine and add-on control equipment as recommended by the engine and control equipment manufacturers or as specified by any other maintenance procedure approved in advance, in writing, by the District.
10. The owner or operator of this engine shall keep the following records: Engine manufacturer name and model number; brake horsepower rating; combustion method (lean burn); fuel type (diesel); California Diesel Fuel Certification; and manual of recommended maintenance provided by the manufacturer, or other maintenance procedures as approved in writing, in advance, by the District. These records shall be kept on-site and made available to District personnel upon request for at least the same period of time as the engine to which the records apply Is.
11. The owner or operator of this engine shall maintain a log containing at a minimum, the following: Records of engine inspection, including dates inspection was performed and records of engine maintenance, including dates maintenance was performed with a description of the nature of the maintenance.
12. All records shall be kept on-site at least three years, unless otherwise indicated by the conditions of this permit, and made available to the District upon request.
13. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
14. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
15. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

DIESEL ENGINE, DETROIT MODEL 16V-149T1, 900 KW, #2 DIESEL FUELED, S/N 16E0007582, LOCATED IN ENGINE #2 FLOATING DRY DOCK (AP #930850 EAD 7/18/95) (AP #976431 EAD 8/1/05)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [34D] Engine for Non-Emergency & Non-Cogeneration

BEC: 12302

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The engine hour meter shall be maintained in good working order and used for recording operating hours in the daily log. The compliance section at the District shall be notified prior to an hour meter replacement.
2. Fuel samples may be obtained from the site by District personnel at anytime for analysis, at the permittee's expense, to determine compliance with fuel quality requirements.
3. Operation of this engine shall not exceed 1000 hours per 12 consecutive month period.
4. A log showing hours of operations shall be maintained on the premises for at least two (2) years and be made readily available for inspection by the District upon request. Log entries shall be made on a daily basis when the engine is operated.
5. This engine shall use only California vehicular diesel fuel. Records of California Diesel Fuel Certification shall be maintained on-site and made available to District personnel upon request.
6. Rule 50-visible emission limits: Air contaminant emissions shall not be more dense than 20% (or number 1 on Ringelmann chart) for more than three (3) minutes in any consecutive 60 minute period. Crankcase smoke shall also be in compliance with Rule 50.
7. Rule 51-public nuisance: Equipment shall not cause or contribute to public nuisance.
8. The owner or operator of each engine shall conduct periodic inspections of each engine and add-on control equipment to ensure that each engine is operated in compliance. Inspections shall be conducted at least once every 4,000 hours of operation, or every six months, whichever occurs first.

9. The owner or operator shall conduct periodic maintenance of each engine and add-on control equipment as recommended by the engine and control equipment manufacturers or as specified by any other maintenance procedure approved in advance, in writing, by the District.
10. The owner or operator of this engine shall keep the following records: Engine manufacturer name and model number; brake horsepower rating; combustion method (lean burn); fuel type (diesel); California Diesel Fuel Certification; and manual of recommended maintenance provided by the manufacturer, or other maintenance procedures as approved in writing, in advance, by the District. These records shall be kept on-site and made available to District personnel upon request for at least the same period of time as the engine to which the records apply to.
11. The owner or operator of this engine shall maintain a log containing at a minimum, the following: Records of engine inspection, including dates inspection was performed and records of engine maintenance, including dates maintenance was performed with a description of the nature of the maintenance.
12. All records shall be kept on-site at least three years, unless otherwise indicated by the conditions of this permit, and made available to the District upon request.
13. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
14. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
15. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

Fiberglass reinforced plastic machining booth (Booth A) with dimensions 40 ft long, 8 ft wide, and 8 ft high, using various hand machining tools including but not limited to: Dewalt drill, Model: DC930, S/N: 925285; Porter Cable router, Model: 75192, S/N: 038500; Porter Cable sander, Model: 362, S/N: 160383; Skillsaw circular saw, Model: 77, S/N: HC-862860; vented to Donaldson Torit dust collector, Model: DF04-16, S/N: TG926496, containing eight MERV 13 cartridge filters. (APCD2009-APP-987982/CCN/Sep 2010)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [36A] Grinding Booth or Room

BEC: APCD2010-CON-000208

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Air pollution control equipment shall be maintained in good operating condition and shall be in full operation in accordance with manufacturer's instructions at all times when the process equipment is in operation.
2. All process and storage equipment with air pollution control equipment shall be maintained and operated so that there is no leakage (0% opacity during operation and free of accumulated dust when not in operation) of air contaminants to the atmosphere prior to their treatment in the air pollution control system.
3. The doors to the fiberglass processing room shall remain closed whenever the equipment is in operation.
4. The floor of the fiber glass machining areas shall be vacuumed each day of operation, and measures shall be taken to prevent carrying out of dust from the work areas.
5. A differential pressure gauge shall be installed across the dust collector filter media and maintained in good working order at all times to measure the pressure drop across the filters. The pressure drop across the filter media shall be maintained between 0.1 and 7 inches of water. The gauge readings shall be noted in an equipment logbook on each day of equipment use. The logbook shall be kept on site and made available to the district upon request.
6. Air ducts and the air pollution control device shall be inspected, cleaned and repaired no less frequently than on 6 month intervals. The date that equipment is inspected, cleaned or repaired shall be recorded in an inspection/maintenance log book, which shall be made available to the District upon request.

7. The removal and cleaning of the filters and screens, and the disposal of the dust, shall be done in a careful manner to minimize dust emissions to the atmosphere.
8. All fiberglass particulate collected for disposal shall be stored in a sealed container pending disposal. There shall be no open disposal of fiberglass particulate.
9. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
10. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
11. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

Fiberglass reinforced plastic machining booth (Booth B) with dimensions 23 ft long, 10 ft wide, and 8 ft high, using various hand machining tools including but not limited to: Dewalt drill, Model: DC930, S/N: 925285; Porter Cable router, Model: 75192, S/N: 038500; Porter Cable sander, Model: 362, S/N: 160383; Skillsaw circular saw, Model: 77, S/N: HC-862860; vented to Donaldson Torit dust collector, Model: DF04-16, S/N: TG926496, containing eight MERV 13 cartridge filters. (APCD2009-APP-988094/CNN/Sep 2010)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [36A] Grinding Booth or Room

BEC: APCD2010-CON-000208

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Air pollution control equipment shall be maintained in good operating condition and shall be in full operation in accordance with manufacturer's instructions at all times when the process equipment is in operation.
2. All process and storage equipment with air pollution control equipment shall be maintained and operated so that there is no leakage (0% opacity during operation and free of accumulated dust when not in operation) of air contaminants to the atmosphere prior to their treatment in the air pollution control system.
3. The doors to the fiberglass processing room shall remain closed whenever the equipment is in operation.
4. The floor of the fiber glass machining areas shall be vacuumed each day of operation, and measures shall be taken to prevent carrying out of dust from the work areas.
5. A differential pressure gauge shall be installed across the dust collector filter media and maintained in good working order at all times to measure the pressure drop across the filters. The pressure drop across the filter media shall be maintained between 0.1 and 7 inches of water. The gauge readings shall be noted in an equipment logbook on each day of equipment use. The logbook shall be kept on site and made available to the district upon request.
6. Air ducts and the air pollution control device shall be inspected, cleaned and repaired no less frequently than on 6 month intervals. The date that equipment is inspected, cleaned or repaired shall be recorded in an inspection/maintenance log book, which shall be made available to the District upon request.

7. The removal and cleaning of the filters and screens, and the disposal of the dust, shall be done in a careful manner to minimize dust emissions to the atmosphere.
8. All fiberglass particulate collected for disposal shall be stored in a sealed container pending disposal. There shall be no open disposal of fiberglass particulate.
9. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
10. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
11. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

May operate marine coating facility consisting of:
Marine coating operations to apply coatings on ships and related structures intended for exposure to a marine environment at BAE Systems San Diego Ship Repair's facility including: 3 piers up to 700 feet in length, one 22,000-ton floating dry dock, various open paint areas, and temporary structures of various sizes.

Equipment required when spray applying any coatings that contain Cr, Pb, Mn, Ni, Cd, As, or Be: either a structure with a full roof and at least three complete walls or complete side curtains or a mobile ventilated structure as defined in this permit to operate. These structures shall be equipped with high efficiency filters in compliance with this permit and shall ensure that air is drawn into the structure when in use.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27B] Marine Coating

BEC: 0737A

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. At no time shall the subject equipment cause or contribute to a nuisance as specified in District Rule 51. If compliance with Rule 51 cannot be demonstrated to the satisfaction of the District, the applicant will take whatever corrective action necessary to meet applicable requirements. If corrective action requires any physical change or modification to the subject equipment, the applicant shall receive prior District approval by applying for and obtaining an Authority to Construct for all such modifications. (Rule 51)
2. All marine coating operations conducted at this stationary marine coating source shall be conducted under a valid stationary Permit to Operate (PTO). For the purposes of this condition, a stationary marine coating source (SIC 3731) is a piece of land or contiguous pieces of land under common ownership or entitlement to use, where the combined usage of marine coatings is greater than 20 gallons in any consecutive 12-month period or the combined VOC emissions from marine coating operations are greater than 150 pounds in any consecutive 12-month period. Portable equipment shall not supplant or supplement the primary activity of a stationary source as described by the source's Standard Industrial Classification Code (SIC).

3. All equipment associated with air contaminant emissions from this operation or that affects the air contaminant emissions shall not deviate from the above equipment description. The permittee shall submit an application to the District and wait for approval in writing prior to modifying any such equipment. (Rule 10)
4. Permittee shall only apply coatings using one of the following methods: High Volume Low Pressure (HVLP) spray application, airless spray gun, electrostatic spray application, dip coat, roll coat or hand application methods (brushes, rollers, markers, marking pens, etc.). Alternatively, an equivalent application method that has been approved by the District in writing might be used. (Rule 20.2)
5. The total Volatile Organic Compound (VOC) emissions from this operation shall not exceed an average of 3000 pounds per day. The average daily emissions shall be calculated by dividing the total VOC emissions in a calendar month by the number of days on which coating operations are conducted in that calendar month. (Rule 20.3)
6. Total emissions of Volatile Organic Compounds (VOC) from all marine coating equipment operated under this permit to operate shall not exceed 40 tons in any consecutive 12 months (Rule 20.3).
7. Curtains or shroudings shall be used during painting operations when wind speed exceeds 10 miles / hour.
8. Marine coating operations shall comply with all applicable requirements of Rule 67.18. (Rule 67.18)
9. The VOC content of non-specialty coatings for marine coating operations subject to Rule 67.18 shall not contain more than 340 grams per liter VOC for air dried coatings and not more than 275 grams per liter for baked coatings. (Rule 67.18)
10. Marine surface preparation materials shall meet one of the following requirements:
    a) the VOC content does not exceed 200 grams per liter (1.67 pounds per gallon), as applied; or
    b) the initial boiling point is at least 190° C (374° F); or
    c) the total VOC vapor pressure is 45 mm Hg or less at 20° C (68° F).
    (Rule 67.18)
11. Cleaning of equipment used in marine coating operations shall meet one of the following requirements:
    a) the application equipment or equipment parts are cleaned in a container which is open only when being accessed for adding, cleaning, or removing application equipment or when cleaning materials is being added, provided the cleaned equipment or equipment parts are drained to the container until dripping ceases, or
    b) a system that totally encloses the component parts being cleaned during the washing, rinsing, and draining processes, or
    c) a device, approved prior to use by the Air Pollution Control Officer, which has been demonstrated to be as effective as any of the equipment described above in minimizing VOC emissions to the atmosphere.
    (Rule 67.18 and 20.3)
12. The Permittee shall maintain record keeping for marine coating operations in accordance with Rule 67.18 and this permit to operate. The records shall contain, at a minimum, the following information:
    a) current list of coatings, coating components (bases, catalysts, thinners, etc.), surface preparation materials and equipment cleaning materials in use. Materials shall be identified as follows:
    1. coatings shall specify category as per Rule 67.18(D)(1) or 67.18(D)(2) manufacturer name, manufacturer identification, VOC content and mix ratio;
    2. coating components shall specify manufacturer name, identification, VOC content and mix ratio;
    3. surface preparation materials and equipment cleaning materials shall specify manufacturer name and manufacturer identification (VOC content, vapor pressure and boiling point shall be listed as applicable);
    4) current documentation to demonstrate applicability of any specialty coating category pursuant to Rule 67.18(D)(2);
    b) current Material Safety Data Sheets (MSDS) or manufacturer's specifications for all materials containing VOCs and/or TACs. MSDS and manufacturer's specifications shall, at minimum, contain the following information: VOC content weight or weight percentage, TAC content weight or weight percentage and material density (weight per volume) or material specific gravity (material density relative to the density of water);
    c) type of application equipment used;
    d) daily or monthly usage records shall be kept for all materials containing VOC. If monthly records are maintained, the number of operating days per calendar month shall be recorded; and,
    e) daily or monthly VOC emissions.

13. All records required by this permit, including emission and usage records, shall be maintained on site for at least five (5) years and made readily available to the District upon request. (MACT HHHHHH)
14. All materials containing Volatile Organic Compounds shall be stored in closed containers in accordance with Rule 67.17 requirements. (Rule 67.17)
15. All chemical strippers that contain methylene chloride (MeCl CAS 75-09-2) shall be stored in closed containers. (MACT HHHHHH)
16. The permittee shall comply with the requirements in conditions 18 through 25 when spray applying any coating containing compounds of chromium (Cr), lead (Pb), manganese (Mn), nickel (Ni), or cadmium (Cd), to any part or product made of metal or plastic, or combinations of metal and plastic. For the purposes of this condition, spray application means coatings that are applied using a hand-held device that creates an atomized mist of coating and deposits the coating on a substrate. Spray-applied coatings do not include the following materials or activities: coatings applied from a hand-held device with a paint cup capacity that is equal to or less than 3.0 fluid ounces (89 cubic centimeters) or surface coating application using powder coating, hand-held, non-refillable aerosol containers, or non-atomizing application technology, including, but not limited to, paint brushes, rollers, hand wiping, flow coating, dip coating, electro deposition coating, web coating, coil coating, touch-up markers, or marking pens. (MACT HHHHHH).
17. The permittee shall comply with the requirements in conditions 18 and 19 when spray applying any coating containing beryllium (Be) or arsenic (As). For the purposes of this condition spray applied means using a hand-held device that creates an atomized mist of coating and deposits the coating on a substrate. Spray-applied coatings do not include the following materials or activities: surface coating application using powder coating, hand-held or non-refillable aerosol containers, and non-atomizing application technology, including, but not limited to, paint brushes, rollers, hand wiping, flow coating, dip coating, electro deposition coating, web coating, coil coating, touch-up markers, and marking pens. (Rule 1200)
18. Spray application of materials containing chromium, lead, manganese, nickel, cadmium, beryllium or arsenic shall only occur within a structure that meets the following requirements:
    a) ventilated so that air is drawn into the structure, and
    b) equipped with filters that achieve 98% capture efficiency, and
    c) equipped with full roof and at least three complete walls or complete side curtains, or
    d) a mobile ventilate structure, which encloses and, if necessary, seals against the surface around the area being coated such that paint overspray is retained within the structure and directed to the filter.
    (MACT HHHHHH / Rule 1200)
19. The filter used for the coating operation described above shall achieve at least 98% capture efficiency of paint overspray in accordance with one of the following test methods:
    a) American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) Standard 52.1, "Gravimetric and Dust-Spot Procedures for Testing Air-Cleaning Devices Used in General Ventilation for Removing Particulate Matter, June 4, 1992"; or
    b) ASHRAE Standard 52.2 "Method of Testing General Ventilation Air-Cleaning Devices for Removal Efficiency by Particle Size" with manufacturer equivalency data that states ASHRAE Standard 52.1 Arrestance of at least 98%;or,
    c) any other test conducted using all of the following parameters:
    1. paint description: high solids baking enamel; and
    2. spray feed rate: at least 135 grams per minute; and
    3. paint spray method: conventional (non-HVLP) air-atomized spray gun operating at 40 pounds per square inch (psi) air pressure; and
    4. air flow rate across the filter: 150 feet per minute.
20. All paint spray gun cleaning must be done so that an atomized mist or spray of gun cleaning solvent and paint residue is not created outside of the container that collects used gun cleaning solvent. (MACT HHHHHH)
21. All painters must complete a training course that meets the requirements specified in the following condition within 180 days after hiring or 180 days after the Construction Completion Notice is submitted to the District, whichever is later. This certification will be valid for five (5) years. A refresher course must be completed for re-certification every five (5) years. (MACT HHHHHH)

22. The painters training course shall include at a minimum hands-on demonstration and classroom instruction in:
a) selection, set up, and operation of spray gun equipment, including measuring coating viscosity, selecting proper fluid tip or nozzle, and achieving the proper spray pattern, air pressure and volume, and fluid delivery rate; and,
b) spray techniques for different types of coatings to improve transfer efficiency and minimize coating usage and overspray, including maintaining the correct spray gun distance and angle to the substrate, using proper banding and overlap, and reducing lead and lag spraying at the beginning and end of each stroke; and,
c) routine spray booth and filter maintenance, including filter selection and installation.
(MACT HHHHHH)

23. The permittee shall submit a report to the District every calendar year in which information previously submitted has changed. This report should include changes associated with the initial notification required by §63.11175(a), or Notification of Compliance, or a previous annual notification of changes report submitted under this condition. This report shall include any deviations from relevant requirements under § 63.11173 (e) - (g), which includes:
a) proper training of all painters;
b) use of proper application equipment (e.g. HVLP);
c) use of spray booth when coatings are applied, with proper ventilation and filters;
d) proper cleaning of application equipment.
(MACT HHHHHH)

24. The annual notification of changes report must be submitted to the District prior to March 1 of each calendar year when *reportable changes have occurred and must include the following information:*
a) the company's name and the street address (physical location) and the street address where compliance records are maintained, if different;
b) the name, title, address, telephone, e-mail address (if available) and signature of the owner and operator, or other certifying company official, certifying the truth, accuracy, and completeness of the notification;
c) a statement of whether the source has complied with all the relevant standards and other requirements of this permit or an explanation of any noncompliance and a description of corrective actions being taken to achieve compliance.
(MACT HHHHHH)

25. The permittee shall maintain recordkeeping in accordance with NESHAP HHHHHH. These records shall include the following information:
a) current list of personnel by name and job description that are required to be trained;
b) records describing the methods being used to train the painters including demonstration that the training meets all the requirements specified in this Authority to Construct;
c) type of application equipment used;
d) manufacturer data on the exhaust filter's efficiency;
e) any notifications, initial or compliance status, as required by § 63.11175;
f) any notification of changes reports submitted required by § 63.11176;
g) records of any assessments of source compliance performed in support of the initial notification, notification of compliance status or annual notification of changes report.
(MACT HHHHHH)

26. In addition to all of the conditions in this permit, the following four conditions shall apply when a contractor conducts any marine coating operation under this permit. For the purposes of this permit, a contractor is any person not employed by this stationary source and the permittee is employed by the stationary source.

27. Contractors performing marine coating operations shall be provided a copy of this permit prior to commencing coating operations. (Rule 21)

28. Contractors shall report the following information to the permittee for each marine coating operation conducted under this permit in a format approved by the permittee. The information under items A and B shall be provided to the permittee prior to commencing any marine coating operation.
a) current list of coatings, coating components (bases, catalysts, thinners, etc.), surface preparation materials, and equipment cleaning materials in use. Materials shall be identified as follows:
1. coatings shall specify category as per Rule 67.18(D)(1) or 67.18(D)(2), manufacturer name, manufacturer identification, VOC content, and mix ratio;
2. coating components shall specify manufacturer name, identification, VOC content and mix ratio;
3. surface preparation materials and equipment cleaning materials shall specify manufacturer name and manufacturer identification (VOC content, vapor pressure and boiling point shall be listed as applicable), and; 4. current documentation to demonstrate applicability of any specialty coating category pursuant to Rule 67.18(D)(2);
b) current Material Safety Data Sheets (MSDS) or manufacturer's specifications for all materials containing VOCs and/or TACs. MSDS and manufacturer's specifications shall, at minimum, contain the following information: VOC content weight or weight percentage, TAC content weight or weight percentage and material density (weight per volume) or material specific gravity (material density relative to the density of water);
c) type of application equipment used;
d) daily or monthly usage records shall be kept for all materials containing VOC. If monthly records are maintained, the number of operating days per calendar month shall be recorded; and,
e) daily or monthly VOC emissions.
(Rule 67.18 and 21)

29. The permittee shall ensure the usage and/or emission limitation in this permit is not exceeded based on the usage records obtained from the contractor.

29. Contractors shall comply with all conditions in this permit to operate. (Rule 21)

30. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.

31. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.

32. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

SAN DIEGO AIR POLLUTION CONTROL DISTRICT
COMPLIANCE DIVISION
INSPECTION CHECKLIST
FEE CODE 27 – MARINE COATING OPERATIONS

ID #: 00204 Permit / Registration #: 6646 Date of Inspection: 11/14/13

Facility: BAE Systems, foot of Sampson St, SD 92113 Date of Expiration: 9/14

Representative: Cara Bandera Title: Env. Supervisor Phone: 619-557-4209

EQUIPMENT DESCRIPTION

1a. Equipment same as described on permit to operate? YES ☒ Yes ☐ No

1b. If no, are changes i.c.w. Rule(s) 10(a) / 10(b)? N/A ☐ Yes ☐ No

Description of changes: _____

2a. Current permit posted / available per Rule 10(c)? YES ☒ Yes ☐ No

2b. Ownership verified? YES ☒ Yes ☐ No

3. Permit conditions reviewed (current / enforceable)? YES ☐ Yes ☐ No

(If no, complete permit condition change request and describe changes in the comments section)

EQUIPMENT INSPECTION

4. Equipment observed in operation? NO ☐ Yes ☒ No

5. VOC materials stored in closed containers? YES ☒ Yes ☐ No *Rule 67.17*

If no, indicate size of containers, content and quantity below:

Size of Container	Contents	Quantity

6. Is an oven used to bake marine coatings above 194 °F? NO ☐ Yes ☒ No

If yes, what is the oven temperature? _____

7. Facility using compliant surface preparation solvents? YES ☒ Yes ☐ No *Rule 67.18(d)(4)*

a. Mfg. Name / ID#: Proline 747/ MEKMIBK VOC Content: 747: 3 g/l

b. or Boiling Point: _____ or Vapor Pressure: MEKMIBK: 41.9 mmHg

8. Facility using compliant gun cleaning solvent or cleaning method? YES ☒ Yes ☐ No *Rule 67.18(d)(3)*

State cleaning method used: Evap. minimisation, Proline 747, acetone, Bio D premium line cleaner, Amercoat 65, Crown 40/60 MEK/MIBK

Gun cleaning solvent: a. Mfg. Name / ID#: see above VOC Content: 0.03, 0, 3.7, 7.3, 6.7

b. or Boiling Point: _____ or Vapor Pressure: _____

9. COATINGS / SOLVENTS *Rule 67.18(d)(1), (d)(2)*

Mfg Name / ID#	Coating Category	Mix Ratio	VOC Content as applied	VOC Standard	Compliant with Rule 67.18
P C Intl 998,922-4 R SW 152,156,navy111	Air dried		340,98 340	340 g/l	"

P American Safety MS200 C R Interthane 990 (KHA00)	" High Gloss 88%		415 g/l 420 g/l	" 420 g/l	" Yes

10. Does the facility have a control device? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(e)*

If yes, state the type of control device: _____

a. What are the specified operating parameters: _____

b. Is the control device operating within the specified parameters? ☐ Yes ☐ No

c. List operating parameters at time of inspection: _____

RECORDKEEPING

11. Facility has a current list of coatings? YES ☒ Yes ☐ No *Rule 67.18(f)(1)*

12. Facility has current MSDS / product data information to substantiate specialty coating categories? YES ☒ Yes ☐ No *Rule 67.18(f)(1)(ii)*

13. Facility keeping daily or monthly usage records of all coatings used? YES ☒ Yes ☐ No *Rule 67.18(f)(1)(iii)*

14. Facility keeping daily or monthly usage records of surface prep and

cleaning solvents? YES ☒ Yes ☐ No *Rule 67.18(f)(1)(iii)(C)*

15. Facility keeping monthly usage records of material additions to dip tanks? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(1)(iii)(D)*

16. Facility maintaining records of oven temperature? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(1)(iii)(B)*

17. Facility keeping daily records of emission control equipment operating parameters? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(2)(iii)*

18. Facility maintaining inspection and maintenance schedules for the control equipment? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(2)(iii)*

EMISSION REQUIREMENTS / SOURCE TESTING

19. Daily facility emission limit per the permit to operate? 3,000 lb VOC/day avg. per mth, 40 tons/12 mth

20. Is the facility exceeding the daily emission limit? NO ☐ Yes ☒ No *Rule 21*

If yes, state the number of days the facility exceeded the emission limit:

Indicate the facility daily usage for,

a. Coatings: Highest monthly (July 2013): 4,100 lbs sprayed. (includes contractors) July avg. 4,100lbs/31days operation (132.5 lbs/day avg.) <<limit 3,000lbs/day (avg.). 2012 VOC 12.04 tons, <<40 tons (limit)

b. Surface Preparation Solvents:

c. Cleaning Solvents:

21. Is the facility required to be source tested? NO ☐ Yes ☒ No *Rule 21*

If yes, state the source test frequency and the results of the last source test:

COMPLIANCE ACTIONS

22. Notice to Comply Issued? NO ☐ Yes ☒ No Document No.

Rules:

List NTC items below:

23. Notice of Violation Issued? NO ☐ Yes ☒ No Document No.

Rules:

List NOV items below:

Additional Comments: VOC emissions calcs are based on less exempt values so actual emissions would be lower.

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

MARINE/METAL PARTS COATING OPERATION: ONE (1) M & W PAINT SPRAY BOOTH (9'H X 14'W X 26'L) EQUIPPED WITH AN EXHAUST FILTERING SYSTEM AND USING DEVILBISS CONVENTIONAL, GRACO G-1265 HVLP, AND WAGNER T-10 AIRLESS SPRAY GUNS. A HERKULES GUN WASHER IS USED FOR EQUIPMENT CLEANUP.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27C] Marine Coating - Additional
1 [49A] *Non-Operational Status Equipment*

BEC: APCD2010-CON-000132

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. This equipment shall not be operated at any time except where limited use of this equipment is allowed without a permit to operate under a Rule 11 exemption. This limited usage shall be subject to all other applicable prohibitory rules. All records and data necessary to substantiate this Rule 11 exemption shall be maintained on site for a minimum of three calendar years and made available to the District upon request.
2. If the previously applicable permit to operate (prior to inactivation) required source testing, the equipment shall be source tested within 60 calendar days of permit reactivation. This source testing is required to demonstrate compliance with emission standards contained in the previously applicable permit to operate, it is the responsibility of the permittee to schedule the source test with the District. The source test shall be performed or witnessed by the District.
3. The permittee shall submit an application and obtain written approval from the District prior to operating the equipment under inactive status. In the event new or additional requirements are applicable to this equipment upon reactivation, the permittee shall submit an application and additional information with corresponding fees to demonstrate how the permittee will comply with the new or additional requirements and to add corresponding permit conditions.
4. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
5. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.

10. Does the facility have a control device? _____ ☐ Yes ☐ No ☒ N/A *Rule 67.18(e)*

If yes, state the type of control device: _____

a. What are the specified operating parameters: _____

_____

b. Is the control device operating within the specified parameters? ☐ Yes ☐ No

c. List operating parameters at time of inspection: _____

_____

RECORDKEEPING

11. Facility has a current list of coatings? YES ☒ Yes ☐ No *Rule 67.18(f)(1)*

12. Facility has current MSDS / product data information to substantiate specialty coating categories? YES ☒ Yes ☐ No *Rule 67.18(f)(1)(ii)*

13. Facility keeping daily or monthly usage records of all coatings used? N/A ☐ Yes ☐ No *Rule 67.18(f)(1)(iii)*

14. Facility keeping daily or monthly usage records of surface prep and

cleaning solvents? N/A ☐ Yes ☐ No *Rule 67.18(f)(1)(iii)(C)*

15. Facility keeping monthly usage records of material additions to dip tanks? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(1)(iii)(D)*

16. Facility maintaining records of oven temperature? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(1)(iii)(B)*

17. Facility keeping daily records of emission control equipment operating parameters? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(2)(iii)*

18. Facility maintaining inspection and maintenance schedules for the control equipment? N/A ☐ Yes ☐ No ☒ N/A *Rule 67.18(f)(2)(iii)*

EMISSION REQUIREMENTS / SOURCE TESTING

19. Daily facility emission limit per the permit to operate? _____

20. Is the facility exceeding the daily emission limit? NO ☐ Yes ☒ No *Rule 21*

If yes, state the number of days the facility exceeded the emission limit: _____

Indicate the facility daily usage for,

a. Coatings: _____

b. Surface Preparation Solvents: _____

c. Cleaning Solvents: _____

21. Is the facility required to be source tested? NO ☐ Yes ☒ No *Rule 21*

If yes, state the source test frequency and the results of the last source test: _____

CERTIFICATE OF REGISTRATION

EXPIRES: September 30, 2014

This Certificate is not valid until required fees are received by the District.

The above is hereby granted a Certificate of Registration for the article, machine, equipment or contrivance described below. This Certificate of Registration is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Certificate of Registration or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

Portable diesel engine, Cummins Model QSL9, S/N: 73524323, 260 BHP, Model Year 2013, EPA certified Tier 4i offroad, engine family DCEXL08.9AAH. Equipped with an OEM diesel particulate filter and diesel oxidation catalyst. Powering a heavy lift crane on a floating barge.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 2, 12/12.1, 40, 50, 51.

Fee Schedules: 1 [34X] Registered Portable Engine (Rule 12.1)

BEC: APCD2013-CON-000664

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The total NOX or VOC emissions from a unit shall not exceed 100 pounds during any one day for each pollutant.

2. PM10 emissions, excluding area fugitives, from a unit shall not exceed either 0.10 grains per dry standard cubic foot or 150 pounds per day.

3. The actual emissions of any air contaminant, except area fugitive emissions from this unit, as verified by required recordkeeping, shall not exceed 10 tons per calendar year (January through December) in any Air Pollution Control District in which such unit is operated.

4. Except for emergency operations, an emission unit shall not be operated within 1,000 feet of any K-12 school

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

CERTIFICATE OF REGISTRATION

EXPIRES: September 30, 2014

unless California Health and Safety Code section 42301.6 is met.

5. This engine shall use only CARB diesel fuel. (Rule 12.1)

6. The operator shall notify the District within 2 days from when a registered unit is relocated into the District. The notification shall be as specified in Rule 12.1.

7. The following records regarding operation of this equipment in San Diego County shall be maintained and made available to the District for at least 2 years from the date recorded. Records shall be provided to each participating Air Pollution Control District in which the equipment was operated within 30 days after the end of every calendar quarter:
   I. The date and locations at which the equipment was operated.
   II. Date and hours of operation or the type and quantity of fuels consumed on a daily basis.

8. The permittee shall maintain all information required by 17 CCR Section 93118.5(g) on the vessel or at the vessel's homeport for the life of the engine. This information shall be made available to District personnel upon request.

9. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
   (a) old meter's hour reading
   (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter
   (c) copy of receipt of new meter or of installation work order. A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.
   (17 CCR 93118.5)

10. Visible emissions including crank case smoke shall comply with Rule 50. (Rule 50)

11. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)

12. An emission unit is not portable if any of the following apply:
    The unit, or its replacement, is attached to a foundation or, if not so attached, will reside at the same location for more than 12 consecutive months; or
    The emission unit remains or will reside at a location for less than 12 consecutive months if the unit is located at a seasonal source and operates during the full annual operating period of the seasonal source; or
    The emission unit is moved from one location to another in an attempt to circumvent the portable emission unit residence time requirements.

APCD2013-PTO-001647

CERTIFICATE OF REGISTRATION

EXPIRES: September 30, 2014

13. In the event that a portable emission unit is not portable the holder of this certificate of registration shall submit an application for a Permit to Operate to the District.

14. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.

15. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.

16. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

FIBERGLASS/POLYESTER/EPOXY RESIN OPERATION: CONDUCTED OUTDOOR FOR SHIPS' STRUCTURES (MASTS, DECKING, SHAFTS AND RAILS), USING ROLLERS & BRUSHES FOR HAND LAYUP.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27F] Fiberglass/Plastic/Foam Process Line

BEC: 11339

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Annual emissions of the following Toxic Air Contaminants (TAC) from this equipment shall be less than the following: 62.8 lb of styrene and 33 lbof 1, 1, 1 trichloroethane (or tca). These equate to usage of approximately 150 gal of polyester resin and 5 gal of tca solvent in any consecutive 12-months of operation. These emissions calculations are based on polyester resins containing 4.2 lb styrene/gal and on solvents containing 6.6 lb TCA/gal.
2. Permittee shall use only the application equipment specified above. Any change in application method will require modification of this Permit to Operate.
3. Permittee shall not use materials that contain Toxic Air Contaminants (TAC) listed in Rule 1200 except styrene and 1, 1, 1 trichloroethane (synonym for methyl chloroform) as it exists on November, 1998.
4. Daily or monthly records shall be maintained showing the type and amount of resin including hardener, catalyst and solvents used. These records shall be maintained on-site for at least three years and made available to the District upon request.
5. Permittee shall maintain a current list of all polyester resin materials and gel coats used, which provides the manufacturer's identification, material specifications, monomer content, content of any catalysts, fillers and or diluents, including thinner, and type of each e resin (i.e. regular, vapor-suppressed, corrosion-resistant, or fire retardant) or gel coat (i.e.pigmented or clear).
6. Permittee shall comply with all other applicable provisions of Rule 67.12.

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

7. Permittee shall maintain current MSDS's or manufacturer's specifications on-site which identify the VOC content, vapor pressure or initial boiling point, as applicable, for all materials containing organic solvents used in the operation described above.
8. Self-closing containers shall be used for storing, except during the transfer of resin or solvent, all polyester resin, VOC containing cleaning materials and solvent-laden rags, including waste materials.
9. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
10. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
11. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

EQUIPMENT DESCRIPTION

1a. Equipment same as described on permit to operate? YES ☒ Yes ☐ No

1b. If no, are changes i.c.w. Rule(s) 10(a) / 10(b)? N/A ☐ Yes ☐ No

Description of changes: _____

2a. Current permit posted / available per Rule 10(c)? YES ☒ Yes ☐ No

2b. Ownership verified? YES ☒ Yes ☐ No

3. Permit conditions reviewed (current / enforceable)? YES ☒ Yes ☐ No

(If no, complete permit condition change request and describe changes in the comments section)

EQUIPMENT INSPECTION

4. Equipment observed in operation? NO ☐ Yes ☒ No

5. Are resins and gelcoats applied in a spray booth? NO ☐ Yes ☒ No

If no, state where resins and gelcoats are applied: Enclosed tarp building served by filtered fans

a. Are booth filters in place and in good condition? _____ ☐ Yes ☐ No *Rule 21*

b. Are the fans operational? _____ ☐ Yes ☐ No *Rule 21*

6. VOC materials stored in self-closing containers? _____ ☐ Yes ☐ No *Rule 67.12(d)(iv)*

7. Is the facility conducting grinding, cutting and sanding operations within a controlled enclosure or by use of a controlled process? NO ☐ Yes ☒ No *Rule 67.12(d)(v)*

Briefly describe: _____

8. Facility using compliant application equipment? YES ☒ Yes ☐ No *Rule 67.12(d)(vii)*

Type of application equipment used? Airless (chopper style) gun

For HVLP equipment:

Does the facility have an air cap pressure gauge for HVLP paint spray guns? N/A ☐ Yes ☐ No

9. Are cleanup materials reclaimed: *Rule 67.12(d)(vi)*

a. On site ☐ Yes ☒ No Type of reclamation system used: soap, water and some MEK Peroxide

b. Offsite ☐ Yes ☒ No State name and location of recycler: _____

10. In lieu of reclamation, is the facility using cleanup materials that meet one of the following standards?

a. Solvent has a VOC content of 200 g/l or less ☒ Yes ☐ No *Rule 67.12(d)(vi)(A)*

b. Solvent has an initial boiling point of 190° C ☐ Yes ☐ No *Rule 67.12(d)(vi)(B)*

c. Average daily usage of non-compliant solvent is less than 0.5 gal / day. ☒ Yes ☐ No *Rule 67.12(d)(vi)(C)*

11. RESIN / GELCOATS

Mfg Name / ID	Type	Monomer Content	Standard	Compliant with Rule 67.12
Evercoat Bondo/Hardner	Resin	20%	35%	Yes
C-Ville 3M	Resin	30%	35%	Yes

RECORDKEEPING

12. Facility has a current list of resin, gelcoats, and cleaning materials used? YES ☒ Yes ☐ No *Rule 67.12(f)(1)*

13. Facility has current MSDS / product data information? YES ☒ Yes ☐ No *Rule 67.12(f)(2)*

14. Facility keeping daily or monthly usage records of all resins and gelcoats used? YES ☒ Yes ☐ No *Rule 67.12(f)(3)*

15. Facility keeping daily or monthly usage records of cleaning materials used? YES ☒ Yes ☐ No ☐ N/A *Rule 67.12(f)(3)*

EMISSION REQUIREMENTS / SOURCE TESTING

16. What is the facility's permitted emission limit? 62.8 lb styrene, 33lb TCA/12 mth

17. Is the facility exceeding the permitted emission limit? NO ☐ Yes ☒ No ☐ N/A *Rule 21*

If yes, state the number of days the facility exceeded the emission limit: _____

If no, indicate the facility daily usage for,

a. Resins: 5.8 lbs of Styrene August 2012-August 2013

b. Gelcoats: _____

b. Cleaning Solvents: _____

COMPLIANCE ACTIONS

18. Notice to Comply Issued? NO ☐ Yes ☒ No Document No. _____

Rules: _____

List NTC items below:

19. Notice of Violation Issued? NO ☐ Yes ☒ No Document No. _____

Rules:

List NOV items below:

Additional Comments: Limited use of Styrene containing material.

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

Abrasive blast room with recycling equipment: blast room (50ft x 70ft x 31ft h) custom made with metallic rolling doors for access. Dust control equipment Torit Dust collector, Model: 4DF48, Serial No.: 242074, with 48 cartridge filters, dust collection efficiency: 99.99% at 5 microns. Total system flow rate: 23,000 cu ft min driven by a 100 hp fan. Four (4) 6.0 cu.ft. capacity Clemco Model 2452 abrasive blast machines, two (2) Clemco Industries Corporation media recovery systems, each with a reclaimer/ hopper and associated ductwork, Serial Nos. 51905 & 52812, each hopper with 106 cu. ft. capacity, with each hopper serving a single reverse pulse type dust collector with cartridge filters and a differential gauge. One (1) 120 cu.ft. and 6-ton capacity Clemco model Big Clem abrasive blast machine with Serial No. 50811; 600 lb abrasive blast pot. (jftapp979485revjun2403)(eadapp982719revnov0607)(APCD2009-APP-987935/CCN/Sep 2010)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [02B] Abrasive Blasting Cabinet

BEC: APCD2010-CON-000209

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. A continuous inspection/maintenance log book shall be maintained with the description of any inspection and/or maintenance and the date of the activity. All entries into the log book shall occur on the day of the inspection/maintenance activity. This log book shall be made available to the District upon request.
2. A differential pressure gauge shall be installed across the dust collector filter media and maintained in good working order at all times to measure the pressure drop across the filters. The pressure drop across the filter media shall be maintained between 0.1 and 7 inches of water. The gauge readings shall be noted in an equipment logbook on each day of equipment use. The logbook shall be kept on site and made available to the district upon request.
3. Damaged filters shall be replaced prior to reuse of the control equipment.
4. The blast room and the abrasive recycling system shall be vented to the dust collector. To avoid fugitive emissions, these operations shall occur only with the blast room access way closed.
5. As a used filter is removed for replacement, inspection, or disposal, the filter shall be placed immediately into a plastic bag to minimize dust emissions. A filter shall be disposed of only if it is in a sealed container that will minimize dust emissions.

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT
10124 OLD GROVE ROAD, SAN DIEGO, CA 92131
PHONE (858) 586-2600 FAX (858) 586-2601

Site ID: APCD1980-SITE-00204
App ID: APCD2012-APP-002046

PERMIT ID
APCD2008-PTO-930298

6. The differential pressure gauge readings, taken across the filters before and after filter cleaning shall be recorded in the log book during equipment use at least once on each day of equipment use.
7. All dust collected shall be stored in a sealed container pending disposal or removal form the premises. There shall be no open disposal of collected dust.
8. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
9. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
10. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

Company Name (d.b.a.): BAE Systems, 2205 Belt St., SD 92113

Company Representative: Cara Bandera Title: Env. Spvsr.

Id #: 00204 Permit #: 930298 Date of Expiration: 9/14

Date of Inspection: 11/14/13

EQUIPMENT DESCRIPTION

1. Equipment same as described on permit to operate? YES ☒ Yes ☐ No
   If no, are changes i.c.w. Rule(s) 10(a) / 10(b)? N/A ☐ Yes ☐ No
   Description of changes:

2. Are permit conditions current and enforceable? YES ☒ Yes ☐ No
   (If no, complete permit condition change request and describe changes in the comments section)
3. Current permit posted / available per Rule 10(c)? YES ☒ Yes ☐ No
4. Ownership verified? YES ☒ Yes ☐ No

EQUIPMENT INSPECTION

5. Equipment observed in operation? NO ☐ Yes ☒ No
6. Records kept? YES ☒ Yes ☐ No ☐ N/A
   If yes, amount of Abrasive Used: No limit
7. Type of Abrasive Used: Steel/Cu grit, Red Garnet
8. Type of Control Equipment: Filters
   Operating Parameters (magnehelic gauge reading, etc.): 0.1"- 7" h20; Actual: 3.8" h20
9. Fugitive Emissions: NO ☐ Yes ☒ No ☐ N/A
   Location:
10. Rule 50 Visible Emissions Compliance? YES ☒ Yes ☐ No ☐ N/A
    If no, Opacity: % *(See V/E Evaluation Sheet)*

COMPLIANCE ACTIONS

11. Notice to Comply Issued? NO ☐ Yes ☒ No Document No.
    Rules:
    List NTC items below:

12. Notice of Violation Issued? NO ☐ Yes ☒ No Document No.

Rules:

List NOV items below:

Additional Comments: Logbook of operating conditions reviewed not reviewed due to time constraints. Will review during next quarter inspection in February 2014.

Inspectors signature: Miguel Reynoso Jauregui MRJ Date of Report: 11/22/13

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

REMOTE RESERVOIR SOLVENT CLEANER: MANUFACTURER: SAFETY KLEEN MODEL NO.: 250 DEGREASING SOLVENT: SEE ATTACHMENT AA MAY ALSO BE LABELED AS SYSTEM ONE MODEL 500 (986147/JNH/1008) 950309/RKM/972454/EZI/NOAPP/977401/LKM/985086/EZI

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [28F] Remote Reservoir Cleaners

BEC: APCD2010-CON-000134

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The remote reservoir cleaner (degreaser) described above shall comply with all requirements of Rule 67.6.1. (Rule 67.6.1)
2. The permittee shall only use solvents listed in Attachment AA for the equipment described above. (Rule 67.6.1)
3. The remote reservoir cleaner (degreaser) described above shall be equipped with a cover that completely covers the sink or work area of the degreaser and a cover that completely covers the solvent container. These covers shall not be removed except when work or maintenance is being performed in the degreaser. (Rule 67.6.1)
4. The sink or work area of the degreaser shall have a freeboard height of at least 6 inches (15cm). Freeboard height is the distance from the bottom of the sink or work area to the top of the sink or work area. (Rule 67.6.1)
5. The sink or work area of the degreaser shall be sloped towards the drain such that no pooling of solvent occurs in the sink or work area. (Rule 67.6.1)
6. The degreaser shall not be used for soaking parts. The solvent return opening of the sink or work area of the degreaser shall not be plugged or blocked. (Rule 67.6.1)
7. A permanent, conspicuous, and legible label listing the applicable operating requirements for the degreaser shall be posted on or near the degreaser. (Rule 67.6.1)
8. There shall be no liquid leaks from any portion of the degreaser. If a liquid leak is detected, the leak shall be repaired immediately or the degreaser shall be shut down and drained of solvent in a manner that minimizes emissions. (Rule 67.6.1)

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

App ID: APCD2008-APP-986147

PERMIT ID
APCD2008-PTO-950309

9. The permittee shall not clean any porous or absorbent materials, such as cloth, leather, wood, or rope in the degreaser. (Rule 67.6.1)
10. Solvent spraying, when necessary, shall only be done using a continuous liquid stream at a low enough pressure that does not cause liquid solvent to splash outside of the sink or work area. Fine, atomized, or shower type spray shall not be used. (Rule 67.6.1)
11. Solvent agitation when necessary shall only be done using pump circulation, a mechanical mixer, or ultrasonic agitation. Air or gas bubble agitation shall not be used. (Rule 67.6.1)
12. The degreaser shall not be exposed to air currents or drafts greater than 131 feet (40 meters) per minute. (Rule 67.6.1)
13. The permittee shall minimize solvent carry-out from the degreaser by applying the following methods:
    a) allowing full solvent drainage by placing parts on a rack or by other means,
    b) tipping out any pools of solvent from cleaned parts before removal from the degreaser and,
    c) allowing parts to dry within the degreaser until visually dry or dripping ceases.
    (Rule 67.6.1)
14. Waste solvent and any contaminated residue shall be recycled or disposed of according to requirements based on the California Health and Safety Code Division 20, Chapter 6.3 (beginning at section 25100) concerning hazardous waste disposal. (Rule 67.6.1)
15. When using a mixture (i.e. more than one solvent, solvent and water, etc.), the permittee shall maintain records of the types, amounts, and dates of each material (i.e. water, solvent, etc.) added to and removed from each degreaser. These records shall be kept on site for three (3) years and made available to the District upon request. (Rule 67.6.1)
16. Current material safety data sheets (MSDS) or manufacturer specifications for each solvent used shall be maintained on site and made readily available to the District upon request. The MSDS and/or manufacturer's specifications shall, at minimum, contain the following information: manufacturer name and identification for each solvent, solvent composition (including each ingredient and its percentages), Volatile Organic Compound (VOC) content of solvent expressed in g/l (lb/gal) of material as used, density for each solvent and mix ratios.
17. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
18. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
19. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

Company Name (d.b.a.): BAE Systems, foot of Sampson St, SD 92113

Company Representative: Cara Bandera Title: Env. Supervisor

Id #: 00204 Permit #: 950309 Date of Expiration: 9/14

Date of Inspection: 11/14/13

EQUIPMENT DESCRIPTION

1. Equipment same as described on permit to operate? YES ☒ Yes ☐ No
   If no, are changes i.c.w. Rule(s) 10(a) / 10(b)? N/A ☐ Yes ☐ No
   Description of changes:
2. Are permit conditions current and enforceable? YES ☒ Yes ☐ No
   (If no, complete permit condition change request and describe changes in the comments section)
3. Current permit posted / available per Rule 10(c)? YES ☒ Yes ☐ No
4. Ownership verified? YES ☒ Yes ☐ No

EQUIPMENT INSPECTION

5. Solvent Type Used: QSOL 300
6. Equipment observed in operation? NO ☐ Yes ☒ No *Rule 67.6(d)(1)(i)*
7. Is the degreaser equipped with a tank cover? YES ☒ Yes ☐ No *Rule 67.6(d)(1)(ii)*
8. Is the tank covered when not in use or processing work? YES ☒ Yes ☐ No *Rule 67.6(d)(5)(v)*
9. Is the cover easy to operate with one hand? YES ☒ Yes ☐ No *Rule 67.6(d)(2)(ii)*
10. Is the degreaser equipped with a facility for draining cleaned parts? YES ☒ Yes ☐ No *Rule 67.6(d)(1)(iii)*
11. Are the operating instructions posted? YES ☒ Yes ☐ No *Rule 67.6(d)(1)(iv)*
12. Is the degreaser leaking? NO ☐ Yes ☒ No *Rule 67.6(d)(5)(ii)*
    If yes, where:
13. Is the degreaser located in a drafty are? (e.g., located next to an entryway) NO ☐ Yes ☒ No *Rule 67.6(d)(6)(iv)*
14. Is the degreaser used to clean absorbent or porous material? NO ☐ Yes ☒ No *Rule 67.6(d)(5)(viii)*
    Type of Solvent Flow System Used? Steady flow
15. What is the solvent disposal method? Pick up as haz waste
16. For Contract Units: Name of Contract Service Provider / ID#:

17. Is the facility maintaining records of the amount of solvent added and removed from the degreaser? N/A ☐ Yes ☐ No *Rule 67.6(d)(5)(ix)*

COMPLIANCE ACTIONS

18. Notice to Comply Issued? NO ☐ Yes ☒ No Document No. _____

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

COLD SOLVENT CLEANER: MANUFACTURER: SAFETY-KLEEN MODEL: 34 INTERNAL SIZE: 33.5"L X 24.0"W X 17.0"H SOLVENT: SEE ATTACHMENT AA (986148/JNH/1008) 984159/EZI//RKM/961986/NOAPP

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [28I] Cold Solvent Degreaser

BEC: APCD2010-CON-000136

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The cold solvent cleaner (degreaser) described above shall comply with all requirements of Rule 67.6.1. (Rule 67.6.1)
2. The permittee shall only use solvents listed in Attachment AA for the equipment described above. (Rule 67.6.1)
3. The degreaser described above shall be equipped with:
   A) a readily visible permanent mark or line indicating the maximum allowable solvent level to provide a freeboard ratio greater than or equal to 0.5. Freeboard ratio is the freeboard height divided by the smaller of the interior length or width of the degreaser tank. Freeboard height is the distance from the solvent-air interface to the top of the degreaser, based on inside tank dimensions.
   B) a cover that completely covers the solvent and is easily operable with one hand or mechanically assisted. This cover shall not be removed except when work or maintenance is being performed in the degreaser.
   C) a facility for draining parts such that the drained solvent returns to the container.
   D) a permanent, conspicuous, and legible label listing the applicable operating requirements shall be posted on or near the degreaser.
   (Rule 67.6.1)
4. The permittee shall not allow the actual solvent level to be above the marked maximum solvent level line at any time. (Rule 67.6.1)
5. There shall be no liquid leaks from any portion of the degreaser. If a liquid leak is detected, the leak shall be repaired immediately or the degreaser shall be shut down and drained of solvent in a manner that minimizes emissions. (Rule 67.6.1)

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

PERMIT ID
APCD2008-PTO-961986

6. The permittee shall not clean any porous or absorbent materials, such as cloth, leather, wood, or rope in the degreaser. (Rule 67.6.1)
7. Solvent spraying, when necessary, shall only be done using a continuous liquid stream at a low enough pressure that does not cause liquid solvent to splash outside of the sink or work area. Fine, atomized, or shower type spray shall not be used. (Rule 67.6.1)
8. Solvent agitation when necessary shall only be done using pump circulation, a mechanical mixer, or ultrasonic agitation. Air or gas bubble agitation shall not be used. (Rule 67.6.1)
9. The degreaser shall not be exposed to air currents or drafts greater than 131 feet (40 meters) per minute. (Rule 67.6.1)
10. The permittee shall minimize solvent carry-out from the degreaser by applying the following methods:
A) allowing full solvent drainage by placing parts on a rack or by other means,
B) tipping out any pools of solvent from cleaned parts before removal from the degreaser and,
C) allowing parts to dry within the degreaser until visually dry or dripping ceases.
(Rule 67.6.1)
11. Waste solvent and any contaminated residue shall be recycled or disposed of according to requirements based on the California Health and Safety Code Division 20, Chapter 6.3 (beginning at section 25100) concerning hazardous waste disposal. (Rule 67.6.1)
12. When using a mixture (i.e. more than one solvent, solvent and water, etc.), the permittee shall maintain records of the types, amounts, and dates of each material (i.e. water, solvent, etc.) added to and removed from each degreaser. These records shall be kept on site for three (3) years and made available to the District upon request. (Rule 67.6.1)
13. Current material safety data sheets (MSDS) or manufacturer specifications for each solvent used shall be maintained on site and made readily available to the District upon request. The MSDS and/or manufacturer's specifications shall, at minimum, contain the following information: manufacturer name and identification for each solvent, solvent composition (including each ingredient and its percentages), Volatile Organic Compound (VOC) content of solvent expressed in g/l (lb/gal) of material as used, density for each solvent and mix ratios.
14. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
15. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
16. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

   If no, are changes i.c.w. Rule(s) 10(a) / 10(b)? N/A ☐ Yes ☐ No
   Description of changes:
2. Are permit conditions current and enforceable? YES ☒ Yes ☐ No
   (If no, complete permit condition change request and describe changes in the comments section)
3. Current permit posted / available per Rule 10(c)? YES ☒ Yes ☐ No
4. Ownership verified? YES ☒ Yes ☐ No

EQUIPMENT INSPECTION

5. Solvent Type Used: QSOL 300
6. Equipment observed in operation? NO ☐ Yes ☒ No *Rule 67.6(d)(1)(i)*
7. Is the degreaser equipped with a tank cover? YES ☒ Yes ☐ No *Rule 67.6(d)(1)(ii)*
8. Is the tank covered when not in use or processing work? YES ☒ Yes ☐ No *Rule 67.6(d)(5)(v)*
9. Is the cover easy to operate with one hand? YES ☒ Yes ☐ No *Rule 67.6(d)(2)(ii)*
10. Is the degreaser equipped with a facility for draining cleaned parts? YES ☒ Yes ☐ No *Rule 67.6(d)(1)(iii)*
11. Are the operating instructions posted? YES ☒ Yes ☐ No *Rule 67.6(d)(1)(iv)*
12. Is the degreaser leaking? NO ☐ Yes ☒ No *Rule 67.6(d)(5)(ii)*
    If yes, where:
13. Is the degreaser located in a drafty are? (e.g., located next to an entryway) NO ☐ Yes ☒ No *Rule 67.6(d)(6)(iv)*
14. Is the degreaser used to clean absorbent or porous material? NO ☐ Yes ☒ No *Rule 67.6(d)(5)(viii)*
    Type of Solvent Flow System Used? Steady flow
15. What is the solvent disposal method? Pick up as haz waste
16. For Contract Units: Name of Contract Service Provider / ID#:

17. Is the facility maintaining records of the amount of solvent added and removed from the degreaser? N/A ☐ Yes ☐ No *Rule 67.6(d)(5)(ix)*

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

ONE (1) 316 BHP MITSUBISHI FUSO DIESEL ENGINE, MODEL 6D24-TLA2F, S/N 6D24359428, DRIVING A CRANE ON THE POSD DRY DOCK.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [34E] Dredging or Crane Engines
1 [92D] Annual Fee for Biennial NOx Source Test

BEC: 10857

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The emissions of oxides of nitrogen (NOx) in parts per million (PPMV), calculated as nitrogen dioxide, shall not exceed 6.9 g/BHP-hr, or 535 PPMVat 15% oxygen on a dry basis.
2. The emissions of carbon monoxide (CO) calculated at 15% oxygen on a dry basis, shall not exceed 900 PPMV.
3. Measurement of NOx, CO, carbon dioxide (CO2) and oxygen content of exhaust gas shall be determined in accordance with the San Diego County Air Pollution Control District test method 100, air resources board (ARB) test method 100 or equivalent environmental protection agency (EPA) test method.
4. Equipment shall be available and used to determine average fuel consumption rates during source tests. Raw data required to determine average fuel consumption rates shall be submitted to the District upon request.
5. Emissions source testing shall be performed at no less than 80 percent of the brake horsepower rating. If an owner or operator of an engine demonstrates to the satisfaction of the Air Pollution Control Officer that the engine does not operate at these conditions, then emissions source testing shall be performed at the highest achievable continuous brake horsepower rating or under typical duty cycle or operational mode of the engine.
6. The equipment shall be source tested at least every 24 months using District approved test methods and protocol, to assure compliance with District emissions standards, unless otherwise directed in writing by the District.

7. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
(a) Old meter's hour reading
(b) Replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter
(c) Copy of receipt of new meter or of installation work order. A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.
(Rule 69.4.1, 17 CCR 93115)
8. A log showing daily hours of operation of the equipment shall be maintained on the premises and made available to the District upon request.
9. This engine shall use only California vehicular diesel fuel. Records of California diesel fuel certification shall be maintained on-site and made available to District personnel upon request.
10. Visible emissions including crank case smoke shall comply with Rule 50. (Rule 50)
11. Rule 51-public nuisance: equipment shall not cause or contribute to public nuisance.
12. Periodic inspections of this engine shall be conducted to ensure that the engine and control equipment is operated in compliance with the provisions of Rule 69.4.1. Inspections shall be conducted at least once every 4000 hours of operation, or every six months, whichever occurs first.
13. The following records shall be kept and maintained on-site for at least the same period of time as the engine to which the records apply:
(I) Engine manufacturer name and model number;
(II) Brake horsepower rating;
(III) Combustion method (i.e. rich-burn or lean-burn);
(IV) Fuel type (Diesel);
(V) California diesel fuel certification;
(VII) A manual of recommended maintenance as provided by the engine manufacturer, or other maintenance procedure as approved in writing by the Air Pollution Control Officer.
14. A maintenance log shall be kept and maintained for a minimum of 3 years.this log shall contain, at a minimum, the following:
(I) Records of engine inspection, including dates inspections were performed; and
(II) Records of engine maintenance, including dates maintenance was performed and the nature of the maintenance.
15. Records shall be maintained for at least three years and be made available to the District upon request.
16. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
17. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
18. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

GRM, 27-Feb-03, v3.8

Mechanical Engineering
Source Test Report
Permit Renewal Test

Test Date : September 6, 2006 **Engineer:** Earnest Davis

Site: Southwest Marine, Inc. **Permit To Operate No.** 962075
APPLICATION No. 982718

Equipment: I.C. Engine : 316 BHP Mitsubishi Fuso Diesel Engine, Model 6D24-TLA2F, with a Mechanical Drive, Powering A 90 Ton Crane On The POSD Dry Dock.

Run No.	Run 1	Run 2	Run 3
Time Interval	10:04 AM -10:34 AM	11:11 AM-11:41 AM	12:21 PM -12:51 PM

Test Results:

- Weight used by crane during source test: 4000 lb weight (excluding weight from headache ball)
- Approximate distance traveled of weight per cycle: 100 ft
- Average time for weight to ascend per cycle : 120 seconds
- Average time for weight to descend per cycle : 108 seconds
- Visible emissions were less than 5 % at the exhaust stack during idle mode. Opacity of less than 20% for less than 3 seconds during lifts of the weight and the descent of lifted objects.
- Approximate Maximum Power Output = (tension in line) x rate =

  (Mass of weight X g_c) X {rate} X conversion factor =

  $$[(4000\ lb_m) X (32.174\ ft\text{-}lb_m/lb_f\text{-}s^2)] X \{(100\ ft/120\ s)\} X \frac{(1\ HP)}{(550\ ft\text{-}lb_f/s)} = 195\ HP^*$$

- *Percent load is Actual Load/ Rated Capacity = 195 BHP / 316 BHP = 62% load.*

* Crane No. 23774 is a "straight mechanical drive" crane with no generator. Power output from the engine is estimated.

CERTIFICATE OF REGISTRATION

EXPIRES: September 30, 2014

This Certificate is not valid until required fees are received by the District.

The above is hereby granted a Certificate of Registration for the article, machine, equipment or contrivance described below. This Certificate of Registration is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Certificate of Registration or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

PORTABLE DIESEL ENGINE: 120 HORSEPOWER 1993 DETROIT DIESEL ENGINE MODEL 471-4055G SERIAL NUMBER 4A83021 TO OPERATE A WINCH. 962006 GDS 10/99 {1/12010 EXEMPT FROM 17CCR93116 BY 17CCR93118.5(c)(7)(C) FINAL REG ORDER}

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 2, 12/12.1, 40, 50, 51.

Fee Schedules: 1 [34X] Registered Portable Engine (Rule 12.1)

BEC: 10979

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. PM10 emissions, excluding area fugitives, from a unit shall not exceed either 0.10 grains per dry standard cubic foot or 150 pounds per day.

2. The actual emissions of any air contaminant, except area fugitive emissions from this unit, as verified by required recordkeeping, shall not exceed 10 tons per calendar year (January through December) in any Air Pollution Control District in which such unit is operated.

3. Except for emergency operations, an emission unit shall not be operated within 1,000 feet of any K-12 school unless California Health and Safety Code section 42301.6 is met.

4. The sulfur content of any liquid fuel used shall not exceed 0.05 percent by weight.

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT
10124 OLD GROVE ROAD, SAN DIEGO, CA 92131
(858) 586-2600 FAX (858) 586-2601

PERMIT ID
APCD2009-PTO-962006

CERTIFICATE OF REGISTRATION

EXPIRES: September 30, 2014

5. The operator shall notify the District within 2 days from when a registered unit is relocated into the District. The notification shall be as specified in Rule 12.1.

6. As part of the rental agreement, the owner of a registered rental unit shall provide the operator with a copy of applicable requirements of Rule 12.1 including notification and recordkeeping.

7. The following records regarding operation of this equipment in San Diego County shall be maintained and made available to the District for at least 2 years from the date recorded. Records shall be provided to each participating Air Pollution Control District in which the equipment was operated within 30 days after the end of every calendar quarter:
   I. The date and locations at which the equipment was operated.
   II. Date and hours of operation or the type and quantity of fuels consumed on a daily basis.

8. Visible emissions including crank case smoke shall comply with Rule 50. (Rule 50)

9. An emission unit is not portable if any of the following apply:
   The unit, or its replacement, is attached to a foundation or, if not so attached, will reside at the same location for more than 12- consecutive months; or
   The emission unit remains or will reside at a location for less than 12- consecutive months if the unit is located at a seasonal source and operates during the full annual operating period of the seasonal source; or
   The emission unit is moved from one location to another in an attempt to circumvent the portable emission unit residence time requirements.

10. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)

11. A copy of this registration certificate must be kept with the equipment and presented upon request to the Air Pollution Control District.

12. Days when a portable emission unit is stored in a designated holding or storage area shall not be counted towards the above time limits, provided the emission unit was not operated on that calendar day except for maintenance and was in the designated holding or storage area the entire calendar day.

13. In the event that a portable emission unit is not portable the holder of this certificate of registration shall submit an application for a permit to operate to the District.

14. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.

15. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

MARINE COATING & ADHESIVE MATERIALS APPLICATION OPERATION (PORTABLE, TYPE III): CONDUCTED INSIDE & OUTSIDE MARINE VESSELS, USING (37) WAGNER MDL G-10 AIRLESS, SN'S E-1 THRU E-7, 12, 52, 61, 76, 81, 85, 88, 90, 91, 100 THRU 120; (10) GRACO MDL 236-99HP, SN'S 201 THRU 210; (2) GRACO MASTIC, SN'S 31 & 32; (2) GRACO AIRLESS, SN'S 1 & 2; (25) DEVILBISS MDL JGHV-531 HVLP, SN'S 4, 8, 11, 19, 20, 22, 23, 24, 28, 29, 50 THRU 64 AND (10) ANEST IWATAMDL LPH-200 HVLP, SN'S 100 THRU 109 SPRAY GUNS, BRUSHES, ROLLERS, TROWELS, AND CAULKING GUNS TO APPLY BACT-COMPLIANT MARINE COATINGS & SOLVENTS AND RULE 67.21 COMPLIANT ADHESIVE MATERIALS.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27C] Marine Coating - Additional
1 [27U] Adhesive Materials Application Station

BEC: 12224

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Total Volatile Organic Compound (VOC) emissions, in tons per year, from this portable equipment shall be offset in accordance with District Rule 20.4(d)(5)(ii). VOC emissions shall be limited to the total of leased and/or purchased Emission Reduction Credits (ERC) divided by 1.2. Records of ERC currently leased and/or owned by the permittee and a copy of each lease or purchase agreement shall be retained on-site and provided to the District upon request.
2. The above VOC emissions limits apply only when these portable equipment are operated at stationary sources which have actual emissions of more than 25 tons per year of VOCs or have aggregate potentials to emit of more than 50 tons per year of VOCs. Attached is a list of "sites with estimated actual emissions of 25 tons/year or more of NOX or ROG (VOC)". This attached list will be updated by the District on an annual basis.
3. Permittee shall keep separate emissions records of the above operation conducted for each stationary source included in the list of "sites with estimated actual emissions of 25 tons/year or more of NOX or ROG (VOC)" during each 12 consecutive calendar month period. Emissions during each 12-month period shall be calculated by summing the emissions from each month included in that period. For each calendar month, monthly emissions for the period ending in that month shall be calculated and each made available to the District upon request.

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

App ID: APCD2002-APP-977570

PERMIT ID
APCD2005-PTO-971846

4. Annual emissions of Volatile Organic Compounds (VOC) from the above operation shall not exceed 25.5 tons in any consecutive 12-month period. This equates to approximately 12,775 gallons of combined materials with a VOC content of 4.0 lb/gal in any consecutive 12-month period.
5. This marine coating and adhesive materials application operation shall be conducted at no closer than 130 feet from the property line.
6. The VOC content, in grams/liter, as applied, less water and less exempt compounds, of the following specialty coatings shall not be exceeded: high temperature coating, 420 and low activation interior coating, 340. These VOC limits apply only to marine coatings with mil spec requirements.
7. Materials containing arsenic, cadmium, hexavalent chromium, copper, lead, manganese, nickel or zinc shall be used by hand application method (as defined in Rule 67.3) only, except:
   -Pro-Line/Pro-Zinc 221 Primer
   -Ameron/Amercoat 138HR Base
   -Ameron/Devgrip 137 Base
   -Ameron/Amercoat 3234
8. Average hourly sprayed usages of the following materials shall not be exceeded: 1.4 gal of Ameron/Amercoat138hr base and 5.2 gal of Ameron/Devgrip 137 base. Average hourly sprayed usage is determined by dividing the daily sprayed usage of each of these materials by the corresponding number of sprayed coating operation hours/day, where coating operation is as defined in Rule 67.3.
9. Annual (calendar year) sprayed usages of the following materials shall not be exceeded: 500 gal of Pro-line/Pro-zinc 221 primer, 167 gal of Ameron/Amercoat 138hr base, 500 gal of Ameron/Devgrip 137 base and 4000 gal of Ameron/Amercoat 3234.
10. Average hourly and annual usages of adhesive materials shall not exceed 0.5 gallon and 936 gallons, respectively. Average hourly usage is determined by dividing the total daily adhesive material usages by the total number of adhesive materials application operating hours/day.
11. Usage records and corresponding application method used shall be maintained at a central location on a daily basis for Ameron/Amercoat 138hr base, Ameron/Devgrip 137 base, and all adhesive materials used and on a monthly basis for all materials used. Records shall be made readily available to the District upon request. Daily records shall at minimum contain the follwing information: type of substrate coated (metal parts, aerospace components etc.), the type of coating applied (basecoat, hardener, thinner, clean-up, etc., including the manufacturer's indentification number), mix ratios, volume of each material used, coating application method used, the number of sprayed coating operation hours for Ameron/Amercoat 138hr base and Ameron/Devgrip 137 base and the number of adhesive materials application operation hours.
12. Permittee shall comply with all other applicable provisions of Rule 67.18.
13. Adhesive materials application associated with this marine coating operation shall comply with all applicable provisions of Rule 67.21, including adhesive material VOC limits, surface preparation and cleanup requirements and application equipment cleanup requirements.
14. Permittee shall not use adhesive materials that contain Toxic Air Contaminants identified in Rule 1200 tables i, ii and iii (revision effective dated 02/13/02), except N-Hexane, Mek and Toluene.
15. Permittee shall comply with all record keeping requirements of Rule 67.21, including, maintaining a current list of all materials used which provides all of the data necessary to evaluate compliance. Daily usage records of each adhesive material used and monthly inventory (dispensing) records for each solvent used as an adhesive bonding agent, or for stripping, surface preparation, or cleaning shall be maintained at a central location for at least three years and shall be made available to the District upon request.
16. The portable marine coating and adhesive materials application operation permittee shall provide weekly or monthly usage and emissions records of hazardous air pollutants (HAPs) including the date the materials are applied, permittee's name, address and phone number to the stationary source at the end of the work week or month to allow for a facility wide emissions determination.

17. The portable marine coating and adhesive materials application operation permittee shall provide weekly or monthly usage and emissions records of hazardous air pollutants (HAPs) including the date the materials are applied, permittee's name, address and phone number to the stationary source at the end of the work week or month to allow for a facility wide emissions determination.
18. Permittee shall keep daily records of the brand, model and corresponding serial numbers of the application equipment used at each stationary source. These records shall be maintained at a central location for at least three years and shall be made readily available to the District upon request.
19. Permittee shall use only the application equipment specified above. Any change in application method will require modification of this Permit to Operate.
20. The Permittee will have available on site pressure gauge(s) in proper operating condition to measure the air cap pressure of coating application equipment. The Permittee shall maintain a permanent air pressure at the air cap in the range of 0.1 to 10 psig. This condition applies only to those operations which claim the use of high volume low pressure (HVLP) application equipment to comply with District Rules.
21. All solvents, materials containing solvents and other materials containing organic compounds shall be stored in closed containers in accordance with Rule 67.17 requirements.
22. Permittee shall maintain current MSDS's or manufacturer's specifications on-site which identify the VOC content, vapor pressure or initial boiling point, as applicable, for all materials containing organic solvents used in the operation described above.
23. Permittee shall not conduct any spray application of coatings containing compounds of chromium (Cr), lead (Pb), manganese (Mn), nickel (Ni), or cadmium (Cd). For the purposes of this condition, spray application means coatings that are applied using a hand-held device that creates an atomized mist of coating and deposits the coating on a substrate. Spray-applied coatings do not include the following materials or activities: coatings applied from a hand-held device with a paint cup capacity that is equal to or less than 3.0 fluid ounces (89 cubic centimeters) or surface coating application using powder coating, hand-held, non-refillable aerosol containers, or non-atomizing application technology, including, but not limited to, paint brushes, rollers, hand wiping, flow coating, dip coating, electro deposition coating, web coating, coil coating, touch-up markers, or marking pens. (MACT HHHHHH)
24. The permittee shall not use paint stripping solvents that contain methylene chloride (CAS 75-09-2) in paint removal processes. (Rule 1200)
25. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
26. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
27. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

MARINE COATING & ADHESIVE MATERIALS APPLICATION OPERATION (PORTABLE, TYPE III): CONDUCTED INSIDE & OUTSIDE MARINE VESSELS, USING (37) WAGNER MDL G-10 AIRLESS, SN'S E-1 THRU E-7, 12, 52, 61, 76, 81, 85, 88, 90, 91, 100 THRU 120; (10) GRACO MDL 236-99HP, SN'S 201 THRU 210; (2) GRACO MASTIC, SN'S 31 & 32; (2) GRACO AIRLESS, SN'S 1 & 2; (25) DEVILBISS MDL JGHV-531 HVLP, SN'S 4, 8, 11, 19, 20, 22, 23, 24, 28, 29, 50 THRU 64 AND (10) ANEST IWATAMDL LPH-200 HVLP, SN'S 100 THRU 109 SPRAY GUNS, BRUSHES, ROLLERS, TROWELS, AND CAULKING GUNS TO APPLY BACT-COMPLIANT MARINE COATINGS & SOLVENTS AND RULE 67.21 COMPLIANT ADHESIVE MATERIALS.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27C] Marine Coating - Additional
1 [27U] Adhesive Materials Application Station

BEC: 12224

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Total Volatile Organic Compound (VOC) emissions, in tons per year, from this portable equipment shall be offset in accordance with District Rule 20.4(d)(5)(ii). VOC emissions shall be limited to the total of leased and/or purchased Emission Reduction Credits (ERC) divided by 1.2. Records of ERC currently leased and/or owned by the permittee and a copy of each lease or purchase agreement shall be retained on-site and provided to the District upon request.
2. The above VOC emissions limits apply only when these portable equipment are operated at stationary sources which have actual emissions of more than 25 tons per year of VOCs or have aggregate potentials to emit of more than 50 tons per year of VOCs. Attached is a list of "sites with estimated actual emissions of 25 tons/year or more of NOX or ROG (VOC)". This attached list will be updated by the District on an annual basis.
3. Permittee shall keep separate emissions records of the above operation conducted for each stationary source included in the list of "sites with estimated actual emissions of 25 tons/year or more of NOX or ROG (VOC)" during each 12 consecutive calendar month period. Emissions during each 12-month period shall be calculated by summing the emissions from each month included in that period. For each calendar month, monthly emissions for the period ending in that month shall be calculated and each made available to the District upon request.

4. Annual emissions of Volatile Organic Compounds (VOC) from the above operation shall not exceed 25.5 tons in any consecutive 12-month period. This equates to approximately 12,775 gallons of combined materials with a VOC content of 4.0 lb/gal in any consecutive 12-month period.
5. This marine coating and adhesive materials application operation shall be conducted at no closer than 130 feet from the property line.
6. The VOC content, in grams/liter, as applied, less water and less exempt compounds, of the following specialty coatings shall not be exceeded: high temperature coating, 420 and low activation interior coating, 340. These VOC limits apply only to marine coatings with mil spec requirements.
7. Materials containing arsenic, cadmium, hexavalent chromium, copper, lead, manganese, nickel or zinc shall be used by hand application method (as defined in Rule 67.3) only, except:
   -Pro-Line/Pro-Zinc 221 Primer
   -Ameron/Amercoat 138HR Base
   -Ameron/Devgrip 137 Base
   -Ameron/Amercoat 3234
8. Average hourly sprayed usages of the following materials shall not be exceeded: 1.4 gal of Ameron/Amercoat138hr base and 5.2 gal of Ameron/Devgrip 137 base. Average hourly sprayed usage is determined by dividing the daily sprayed usage of each of these materials by the corresponding number of sprayed coating operation hours/day, where coating operation is as defined in Rule 67.3.
9. Annual (calendar year) sprayed usages of the following materials shall not be exceeded: 500 gal of Pro-line/Pro-zinc 221 primer, 167 gal of Ameron/Amercoat 138hr base, 500 gal of Ameron/Devgrip 137 base and 4000 gal of Ameron/Amercoat 3234.
10. Average hourly and annual usages of adhesive materials shall not exceed 0.5 gallon and 936 gallons, respectively. Average hourly usage is determined by dividing the total daily adhesive material usages by the total number of adhesive materials application operating hours/day.
11. Usage records and corresponding application method used shall be maintained at a central location on a daily basis for Ameron/Amercoat 138hr base, Ameron/Devgrip 137 base, and all adhesive materials used and on a monthly basis for all materials used. Records shall be made readily available to the District upon request. Daily records shall at minimum contain the follwing information: type of substrate coated (metal parts, aerospace components etc.), the type of coating applied (basecoat, hardener, thinner, clean-up, etc., including the manufacturer's indentification number), mix ratios, volume of each material used, coating application method used, the number of sprayed coating operation hours for Ameron/Amercoat 138hr base and Ameron/Devgrip 137 base and the number of adhesive materials application operation hours.
12. Permittee shall comply with all other applicable provisions of Rule 67.18.
13. Adhesive materials application associated with this marine coating operation shall comply with all applicable provisions of Rule 67.21, including adhesive material VOC limits, surface preparation and cleanup requirements and application equipment cleanup requirements.
14. Permittee shall not use adhesive materials that contain Toxic Air Contaminants identified in Rule 1200 tables i, ii and iii (revision effective dated 02/13/02), except N-Hexane, Mek and Toluene.
15. Permittee shall comply with all record keeping requirements of Rule 67.21, including, maintaining a current list of all materials used which provides all of the data necessary to evaluate compliance. Daily usage records of each adhesive material used and monthly inventory (dispensing) records for each solvent used as an adhesive bonding agent, or for stripping, surface preparation, or cleaning shall be maintained at a central location for at least three years and shall be made available to the District upon request.
16. The portable marine coating and adhesive materials application operation permittee shall provide weekly or monthly usage and emissions records of hazardous air pollutants (HAPs) including the date the materials are applied, permittee's name, address and phone number to the stationary source at the end of the work week or month to allow for a facility wide emissions determination.

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. This equipment shall not be operated at any time except where limited use of this equipment is allowed without a permit to operate under a Rule 11 exemption. This limited usage shall be subject to all other applicable prohibitory rules. All records and data necessary to substantiate this Rule 11 exemption shall be maintained on site for a minimum of three calendar years and made available to the District upon request.
2. If the previously applicable permit to operate (prior to inactivation) required source testing, the equipment shall be source tested within 60 calendar days of permit reactivation. This source testing is required to demonstrate compliance with emission standards contained in the previously applicable permit to operate, it is the responsibility of the permittee to schedule the source test with the District. The source test shall be performed or witnessed by the District.
3. The permittee shall submit an application and obtain written approval from the District prior to operating the equipment under inactive status. In the event new or additional requirements are applicable to this equipment upon reactivation, the permittee shall submit an application and additional information with corresponding fees to demonstrate how the permittee will comply with the new or additional requirements and to add corresponding permit conditions.

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

Diesel Engine Powering a 115 ton Link Belt model TG 1900 Gantry Crane: Cummins; model QSX15-C; serial number TBD; Engine Family CCEXL15.0AAK; interim tier 4 certified; 450 bhp rated; turbocharged with charge air cooler and EGR; equipped with Cummins Diesel Oxidation Catalyst and Periodic Trap Oxidizer (DPF)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [34E] Dredging or Crane Engines

BEC: APCD2012-CON-000667

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Fuel consumption of this engine shall not exceed 37,000 gallons in any consecutive 12 month period.
2. This engine shall use only carb diesel fuel. (Rule 69.4.1, 17 CCR 93116)
3. Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
4. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
5. A non-resettable engine hour meter and/or non-resettable totalizing fuel meter shall be installed on this engine, maintained in good working order and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within in 10 calendar days. The written notifications shall include the following information:
   a. old meter's reading.
   b. replacement meter's manufacturer name, model and serial number if available and current reading on replacement meter; and
   c. copy of receipt of new meter or of installation work order.
   A copy of the meter replacement notification shall be maintained on site and made available to the Air Pollution Control District upon request. (Rule 69.4.1)

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT

App ID: APCD2012-APP-002157

PERMIT ID
APCD2005-PTO-971495

6. The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. The periodic maintenance shall be conducted at least once every 4000 hours of operation, or every six months, whichever occurs first. (Rule 69.4.1)
7. The owner or operator of the engine shall maintain the following records on site for at least the same period of time as the engine to which the records apply is located at the site:
   a. documentation shall be maintained identifying the fuel as carb diesel.
   b. manual of recommended maintenance provided by the manufacturer, or maintenance procedures specified by the engine servicing company; and
   c. records of annual engine maintenance including date the maintenance was performed.
   These records shall be made available to the Air Pollution Control District upon request. (Rule 69.4.1)(17 CCR 93116)
8. The owner or operator of the engine shall maintain an operating log that contains the following records: Monthly fuel consumption (gallons) and twelve month rolling total fuel consumption (gallons) as determined by fuel purchase or delivery receipts. This log shall be made available to the Air Pollution Control District upon request. (Rule 20.2)
9. All operational and maintenance logs and fuel use and type and purchase records required by this permit shall be kept for a minimum of 36 months from their date of creation unless otherwise indicated by the conditions of this permit. The records shall be maintained onsite for a minimum of 24 months from their date of creation. Records for the last 24 months of operations shall be made available to the Air Pollution Control District upon request. Records for operation for the last 25 to 36 months shall be made available to the Air Pollution Control District within 5 working days of request.
10. This engine, as part of the fleet that it is included in, shall comply with the fleet averaging standards of 17CCR 93116. A copy of the most recent compliance statement submitted to the California Air Resources Board under 17CCR 93116 shall be provided to District personnel upon request. (17CCR 93116)
11. The responsible official shall submit compliance statements as required by 17CCR 93116. These compliance statements are due to the California Air Resources Board by March 1, 2013, March 1, 2017 and March 1, 2020.
12. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
13. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
14. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

PERMIT TO OPERATE

EXPIRES: September 30, 2014

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

EQUIPMENT DESCRIPTION

MARINE COATING & ADHESIVE MATERIALS APPLICATION OPERATION (PORTABLE, TYPE III): CONDUCTED INSIDE & OUTSIDE MARINE VESSELS, USING (37) WAGNER MDL G-10 AIRLESS, SN'S E-1 THRU E-7, 12, 52, 61, 76, 81, 85, 88, 90, 91, 100 THRU 120; (10) GRACO MDL 236-995HP, SN'S 201 THRU 210; (2) GRACO MASTIC, SN'S 31 & 32; (2) GRACO AIRLESS, SN'S 1 & 2; (25) DEVILBISS MDL JGHV-531 HVLP, SN'S 4, 8 11, 19, 20, 22, 23, 24, 28, 29, 50 THRU 64 AND (10) ANEST IWATAMDL LPH-200 HVLP, SN'S 100 THRU 109 SPRAY GUNS, BRUSHES, ROLLERS, TROWELS, AND CAULKING GUNS TO APPLY BACT-COMPLIANT MARINE COATINGS & SOLVENTS AND RULE 67.21 COMPLIANT ADHESIVE MATERIALS.

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [27C] Marine Coating - Additional
1 [27U] Adhesive Materials Application Station

BEC: 12224

FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. Total Volatile Organic Compound (VOC) emissions, in tons per year, from this portable equipment shall be offset in accordance with District Rule 20.4(d)(5)(ii). VOC emissions shall be limited to the total of leased and/or purchased Emission Reduction Credits (ERC) divided by 1.2. Records of ERC currently leased and/or owned by the permittee and a copy of each lease or purchase agreement shall be retained on-site and provided to the District upon request.
2. The above VOC emissions limits apply only when these portable equipment are operated at stationary sources which have actual emissions of more than 25 tons per year of VOCs or have aggregate potentials to emit of more than 50 tons per year of VOCs. Attached is a list of "sites with estimated actual emissions of 25 tons/year or more of NOX or ROG (VOC)". This attached list will be updated by the District on an annual basis.
3. Permittee shall keep separate emissions records of the above operation conducted for each stationary source included in the list of "sites with estimated actual emissions of 25 tons/year or more of NOX or ROG (VOC)" during each 12 consecutive calendar month period. Emissions during each 12-month period shall be calculated by summing the emissions from each month included in that period. For each calendar month, monthly emissions for the period ending in that month shall be calculated and each made available to the District upon request.

COUNTY OF SAN DIEGO, AIR POLLUTION CONTROL DISTRICT
10124 OLD GROVE ROAD, SAN DIEGO, CA 92131
PHONE (858) 586-2600 FAX (858) 586-2601
www.sdapcd.org

Sectors: 5, P
Site ID: APCD1980-SITE-00204
App ID: APCD2002-APP-977569

PERMIT ID
APCD2005-PTO-971845

4. Annual emissions of Volatile Organic Compounds (VOC) from the above operation shall not exceed 25.5 tons in any consecutive 12-month period. This equates to approximately 12,775 gallons of combined materials with a VOC content of 4.0 lb/gal in any consecutive 12-month period.
5. This marine coating and adhesive materials application operation shall be conducted at no closer than 130 feet from the property line.
6. The VOC content, in grams/liter, as applied, less water and less exempt compounds, of the following specialty coatings shall not be exceeded: high temperature coating, 420 and low activation interior coating, 340. These VOC limits apply only to marine coatings with mil spec requirements.
7. Materials containing arsenic, cadmium, hexavalent chromium, copper, lead, manganese, nickel or zinc shall be used by hand application method (as defined in Rule 67.3) only, except:
   -Pro-Line/Pro-Zinc 221 Primer
   -Ameron/Amercoat 138HR Base
   -Ameron/Devgrip 137 Base
   -Ameron/Amercoat 3234
8. Average hourly sprayed usages of the following materials shall not be exceeded: 1.4 gal of Ameron/Amercoat138hr base and 5.2 gal of Ameron/Devgrip 137 base. Average hourly sprayed usage is determined by dividing the daily sprayed usage of each of these materials by the corresponding number of sprayed coating operation hours/day, where coating operation is as defined in Rule 67.3.
9. Annual (calendar year) sprayed usages of the following materials shall not be exceeded: 500 gal of Pro-line/Pro-zinc 221 primer, 167 gal of Ameron/Amercoat 138hr base, 500 gal of Ameron/Devgrip 137 base and 4000 gal of Ameron/Amercoat 3234.
10. Average hourly and annual usages of adhesive materials shall not exceed 0.5 gallon and 936 gallons, respectively. Average hourly usage is determined by dividing the total daily adhesive material usages by the total number of adhesive materials application operating hours/day.
11. Usage records and corresponding application method used shall be maintained at a central location on a daily basis for Ameron/Amercoat 138hr base, Ameron/Devgrip 137 base, and all adhesive materials used and on a monthly basis for all materials used. Records shall be made readily available to the District upon request. Daily records shall at minimum contain the follwing information: type of substrate coated (metal parts, aerospace components etc.), the type of coating applied (basecoat, hardener, thinner, clean-up, etc., including the manufacturer's indentification number), mix ratios, volume of each material used, coating application method used, the number of sprayed coating operation hours for Ameron/Amercoat 138hr base and Ameron/Devgrip 137 base and the number of adhesive materials application operation hours.
12. Permittee shall comply with all other applicable provisions of Rule 67.18.
13. Adhesive materials application associated with this marine coating operation shall comply with all applicable provisions of Rule 67.21, including adhesive material VOC limits, surface preparation and cleanup requirements and application equipment cleanup requirements.
14. Permittee shall not use adhesive materials that contain Toxic Air Contaminants identified in Rule 1200 tables i, ii and iii (revision effective dated 02/13/02), except N-Hexane, Mek and Toluene.
15. Permittee shall comply with all record keeping requirements of Rule 67.21, including, maintaining a current list of all materials used which provides all of the data necessary to evaluate compliance. Daily usage records of each adhesive material used and monthly inventory (dispensing) records for each solvent used as an adhesive bonding agent, or for stripping, surface preparation, or cleaning shall be maintained at a central location for at least three years and shall be made available to the District upon request.
16. The portable marine coating and adhesive materials application operation permittee shall provide weekly or monthly usage and emissions records of hazardous air pollutants (HAPs) including the date the materials are applied, permittee's name, address and phone number to the stationary source at the end of the work week or month to allow for a facility wide emissions determination.

17. The portable marine coating and adhesive materials application operation permittee shall provide weekly or monthly usage and emissions records of hazardous air pollutants (HAPs) including the date the materials are applied, permittee's name, address and phone number to the stationary source at the end of the work week or month to allow for a facility wide emissions determination.
18. Permittee shall keep daily records of the brand, model and corresponding serial numbers of the application equipment used at each stationary source. These records shall be maintained at a central location for at least three years and shall be made readily available to the District upon request.
19. Permittee shall use only the application equipment specified above. Any change in application method will require modification of this Permit to Operate.
20. The Permittee will have available on site pressure gauge(s) in proper operating condition to measure the air cap pressure of coating application equipment. The Permittee shall maintain a permanent air pressure at the air cap in the range of 0.1 to 10 psig. This condition applies only to those operations which claim the use of high volume low pressure (HVLP) application equipment to comply with District Rules.
21. All solvents, materials containing solvents and other materials containing organic compounds shall be stored in closed containers in accordance with Rule 67.17 requirements.
22. Permittee shall maintain current MSDS's or manufacturer's specifications on-site which identify the VOC content, vapor pressure or initial boiling point, as applicable, for all materials containing organic solvents used in the operation described above.
23. Permittee shall not conduct any spray application of coatings containing compounds of chromium (Cr), lead (Pb), manganese (Mn), nickel (Ni), or cadmium (Cd). For the purposes of this condition, spray application means coatings that are applied using a hand-held device that creates an atomized mist of coating and deposits the coating on a substrate. Spray-applied coatings do not include the following materials or activities: coatings applied from a hand-held device with a paint cup capacity that is equal to or less than 3.0 fluid ounces (89 cubic centimeters) or surface coating application using powder coating, hand-held, non-refillable aerosol containers, or non-atomizing application technology, including, but not limited to, paint brushes, rollers, hand wiping, flow coating, dip coating, electro deposition coating, web coating, coil coating, touch-up markers, or marking pens. (MACT HHHHHH)
24. All chemical strippers that contain methylene chloride (MeCl CAS 75-09-2) shall be stored in closed containers. (MACT HHHHHH)
25. Materials containing arsenic, copper and zinc shall be used by hand application method (as defined in Rule 67.3) only, except:
    -Pro-Line/Pro-Zinc 221 Primer
    -Ameron/Amercoat 138HR Base
    -Ameron/Devgrip 137 Base
    -Ameron/Amercoat 3234
26. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
27. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)
27. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.

Notice

Notice of Fire and Safety Hazards You are hereby notified that an inspection of your premises has disclosed the following fire safety hazards and/or violations of the provisions of appropriate local or state codes.

Order to Comply As such conditions are contrary to law you are hereby required to correct these conditions immediately upon receipt of this notice. An inspection to determine whether you have complied will be conducted on or before the next inspection date. Failure to comply with the foregoing order before the date of the next inspection may subject you to further enforcement action and penalties as provided by law.

Potential Enforcement Consequences for Failure to Timely Comply with this Notice Misdemeanor criminal prosecution (maximum fine of $1,000 per day for each violation plus six months in jail), civil injunction, administrative abatement, revocation of permits, recordation of Notice of Violation, civil penalties (maximum of $2,500 per day for each violation).

REGIONAL WATER QUALITY CONTROL PROGRAM RECORDS

Adrian Olivares

From: Lima, Lucas@Waterboards [Lucas.Lima@Waterboards.ca.gov] on behalf of RB9_Records, WB@Waterboards [WB.RB9_Records@waterboards.ca.gov]

Sent: Tuesday, July 22, 2014 11:18 AM

To: Adrian Olivares

Subject: RE: Records Request - East Belt St

Good morning Adrian,

We have upload the documents requested onto our FTP site.

Your folder is named 2205EastBeltStreet. This folder will be automatically deleted within a week.

I suggest to you copy the link below and paste it onto the Windows Explorer browser. That way, it will be much easier to copy the wanted files. Clicking on the link below will require you to copy files one by one.

ftp://swrcb2a.waterboards.ca.gov/pub/rwqcb9/2205EastBeltStreet

Thank you,

Lucas Lima

Dear Mr. Gills:

RE: UNAUTHORIZED RELEASE #T0461/H00120-001
1445 BAYFRONT STREET, SAN DIEGO, CA

The site remediation report submitted to this Department by Applied Hydrogeologic Consultants summarizing the site characterization and mitigation activities at the above referenced location have been reviewed. These reports have also been discussed with staff of the Regional Water Quality Control Board (RWQCB). The RWQCB concurs with the determination of this Department that this site has been adequately mitigated. Based on current requirements and policies, no further action is indicated at this time.

Please be advised that if the current use of the site changes, additional site characterization and mitigation activity may be required. As the property owner, it is your responsibility to notify this Department prior to any such changes.

Thank you for your efforts in resolving this matter. Contact the Hazardous Materials Management Division at (619) 338-2211, if you require any additional assistance.

Sincerely,

GARY R. STEPHANY, Deputy Director
Environmental Health Services

Continental Maritime, Inc.
1995 Bay Front Street
San Diego, CA 92113-2122

Dear Mr. McCarthy:

UNDERGROUND STORAGE TANK (UST) CASE #H00120-002
CONTINENTAL MARITIME OF SAN DIEGO
AT 1995 BAY FRONT STREET, SAN DIEGO, CA

This letter confirms the completion of a site investigation and corrective action for the underground storage tank formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code. Please contact Donn LiPera at (619) 338-2244 if you have questions regarding this matter.

Sincerely,

Richard F. Haas

Xylene	350.0	350.0	5.4	.422	Other				

Comments:

Closure of the 18,000-gallon concrete diesel tank in place was proposed in 1987 because the tank was partially located under building 3. Soil sampling showed elevated levels of TPH diesel. A permit to close the tank in place was issued in August 1987, but the tank was not slurry filled.

From 1987 to 1993, six soil borings were placed and ten groundwater-monitoring wells were installed to assess soil and groundwater contamination. The consultant concluded that the diesel release was assessed and that a separate release of gasoline was migrating from a source north and off the Continental Maritime property. Their conclusion was based on the presence of free product gasoline in up gradient wells, the detection of increasing concentrations of TPH gas and benzene in groundwater north of the diesel tank and the absence of diesel fuel in up gradient wells.

In 1994, the western portion of the tank was removed and the remaining part under the building was slurry filled and approximately 35 cubic yards of contaminated soil was excavated.

In 1998, Alton Geoscience (now TRC) submitted a request for closure identifying a former Unocal pipeline and the current Santa Fe Pacific pipeline as two potential sources for TPH gas and benzene in groundwater. TRC submitted a site investigation report for the Unocal pipeline to support their request. The DEH requested additional information regarding the Santa Fe Pacific pipeline as well as any underground storage tanks within a half-mile radius before considering the case for closure. TRC submitted the requested information in May 1999, and the DEH requested additional groundwater monitoring. In February of 2000, TRC submitted the additional groundwater monitoring requested by the DEH and again requested closure.

In a letter dated April 3, 2003, the DEH stated that a human health risk for benzene must be performed before the site would be considered for closure.

TRC submitted a Corrective Action Plan (CAP) dated October 2003, recommending natural attenuation for groundwater remediation. Additionally, the CAP stated that the Continental Maritime buildings affected by the benzene plume were no longer occupied and scheduled for demolition and replacement with a parking lot. TRC concluded no health risk exists since there are no longer any human receptors. As of 11/10/2004, buildings 3, 4, 5 and 9 have been removed and the parking lot is under construction. TRC estimates that approximately 480 cubic yards of fuel-affected soil remain in the subsurface with average concentrations of 603 mg/kg for TPHd and .0014mg/kg for benzene.

DEH conditionally approved the CAP and public review and comment began July 28, 2004, and ended August 30, 2004. No comments were received and the DEH concurs with the CAP recommendations.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes

Does corrective action protect public health for current land use? Yes

Case oversight completed based upon the current site use as a ship building facility.

Site Management Requirements:

Any contaminated soil excavated as part of subsurface construction work must be managed in accordance with the legal requirements at that time.

Should corrective action be reviewed if land use changes? Yes

Monitoring Wells Decommissioned: Yes	Number Decommissioned: 11(see permit #LMON101947)	Number Retained: 0

List Enforcement Actions Taken: Notice of Corrective Action and Reimbursement Responsibility

List Enforcement Actions Rescinded: None

SITE ASSESSMENT AND MITIGATION DIVISION

February 25, 1997

Continental Maritime of San Diego, Inc.
Attn: Ms. Tina Best
1995 Bay Front Street
San Diego, CA 92113

Dear Ms. Best:

UNDERGROUND STORAGE TANK (UST) CASE
CONTINENTAL MARITIME OF SAN DIEGO, INC.
AT 1995 BAY FRONT STREET, SAN DIEGO, CA 92113
#H00120-003

This letter confirms the completion of a site investigation and remedial action for the underground storage tank formerly located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Section 2721(e)of Title 23 of the California Code of Regulations.

Please contact Mo. Lahsaie at (619) 338-2256 if you have questions regarding this matter.

Sincerely,

CHUCK PRYATEL, Chief
Site Assessment and Mitigation Division

I. AGENCY INFORMATION **DATE: FEBRUARY 13, 1997**

Agency Name: County of San Diego, Environmental Health, SAM	Address: PO Box 85261
City/State/ZIP: San Diego, CA 92186-5261	Phone: (619) 338-2222 Fax: (619) 338-2377
Responsible Staff Person: Mo.Lahsaie	Title: Hazardous Materials Specialist

II. CASE INFORMATION

Site Facility Name: Continental Maritime of San Diego, Inc.		
Site Facility Address: 1995 Bay Front Street, San Diego, CA 92113		
RB LUSTIS Case No: N/A	Local Case No: H00120-003	LOP Case No: N/A
URF Filing Date: 7/10/1992	SWEEPS No: N/A	
Responsible Parties	Addresses	Phone Number
Continental Maritime of San Diego, Inc.	1995 Bay Front Street, San Diego, CA 92113	(619)234-8851

Tank No.	Size in Gal.	Contents	Closed in Place/Removed?	Date
1	2,200	Diesel	Removed	04/29/1994

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Leaky UST system			
Site Characterization complete? Yes	Date Approved By Oversight Agency: 01/02/97		
Monitoring Wells Installed? Yes	Number: eight (8)	Proper Screened Interval? Yes	
Highest GW Depth Below Ground Surface: 9.03 feet	Lowest Depth: 9.75 feet	Flow Direction: South	
Most Sensitive Current Use: None			
Are Drinking Water Wells Affected? No	Aquifer Name: San Diego Mesa HA		
Is Surface Water Affected? No	Nearest SW name: San Diego Bay		
Off-Site Beneficial Use Impacts (addresses/locations): None			
Report(s) on file? Yes	Where is Report(s) Filed? County of San Diego, Environmental Health		

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL

Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	1	Disposed	4/29/94
Piping	N/A		
Free Product			
Soil	Approx. 200 cubic yards	Disposed at TPS Technologies, Adelanto, CA	03/95
Groundwater			
Barrels			

Case Closure Summary
Leaking Underground Fuel Storage Tank Program

III. RELEASE AND SITE CHARACTERIZATION INFORMATION (Continued)

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS – BEFORE AND AFTER CLEANUP

Contaminant	Soil(ppm)		Water (ppm)		Contaminant	Soil (ppm)		Water (ppm)	
	Before	After	Before	After		Before	After	Before	After
TPH (Diesel)			<0.5	-	Xylene	0.10	0.073	.0018	.0023
TPH 418.1 (Diesel)	16,000	8,200			Ethylbenzene	0.08	<0.05	<.0005	0.0007
Benzene	<0.025	<0.05	0.0009	<0.0005	Oil & Grease				
Toluene	<0.025	<0.05	<0.0005	.001	Heavy Metals				
Other (O-Pb)	<0.3				Total PNAs				0.0037

Comments:

An unknown UST was discovered underneath the Administration building (building #1) at the subject site. A maximum of 2 feet of a heavy petroleum hydrocarbon was reportedly observed on groundwater beneath the site. Free petroleum product was removed from the groundwater table and approximately 200 cubic yards of petroleum contaminated soil was removed from the former UST excavation area and was disposed at TPS Technologies Inc. Estimated volume of 80 cubic yards of petroleum impacted soil with an average TRPH concentration of 1,886 mg/kg remains in place beneath the railroad tracks on the east side of the former UST excavation. The quality of groundwater has been monitored since the free petroleum product was removed and the groundwater benzene concentration is below laboratory detection limits. Based on the RWQCB memorandum dated April 1, 1996, it appears that the subject site is classified as a "Low Risk Groundwater" site. Based on the reported information there is no apparent threat to public safety and/or environmental health at this site.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes

Does corrective action protect public health for current land use? Yes

Site Management Requirements: If remaining petroleum impacted soils are excavated in the future, the soil needs to be managed in accordance with the laws and regulations at that time.

Should corrective action be reviewed if land use changes? Yes

Monitoring Wells Decommissioned: No	Number Decommissioned: None	Number Retained: Eight (8)

List Enforcement Actions Taken: Notice of Corrective Action and Reimbursement Responsibility

List Enforcement Actions Rescinded:

V. LOCAL AGENCY REPRESENTATIVE DATA

Name: Chuck Pryatel	Title: Chief Site Assessment and Mitigation	
Signature:		Date: 2-25-97
Hydrogeologist Concurrence: KMH		Date: 2/24/97

VI. RWQCB NOTIFICATION

Date Submitted to RB: 2/13/1997	RB Response: Concurred with no further action	
RWQCB Staff Name: John Odermatt	Title: Associate Engineering Geologist	Date: 02/20/1997

VII. ADDITIONAL COMMENTS, DATA, ETC.

Existing monitoring wells will be decommissioned by responsible party within the next quarter.

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

RICHARD HAAS
ASSISTANT DIRECTOR

March 15, 2004

Mr. Ron Halik
CP Kelco
2145 East Belt Street
San Diego, CA 92112

Dear Mr. Halik:

VOLUNTARY ASSISTANCE PROGRAM, FILE H02377-009
CP KELCO, LOCATED AT 2145 BELT STREET, SAN DIEGO, CA

The Department of Environmental Health (DEH), Site Assessment and Mitigation Program (SAM), has reviewed the environmental investigation report related to the above-referenced property, prepared by *England Geosystem Environmental Engineering*, dated March 2003. The report summarizes the site investigation activities performed at the referenced location. Provided that the information presented to DEH/SAM was complete, accurate, and representative of existing site conditions, **this agency concurs that the cleanup goals established for the subject site have been met.**

Please be advised that this letter does not relieve the responsible party of any liability under the California Health and Safety Code or the Porter Cologne Water Quality Control Act.

Changes in the present use of the above site *as industrial processing* may require reevaluation to determine if the change will pose a risk to public health.

Thank you for selecting the Department of Environmental Health as your lead agency to assist you with the progress of your environmental project. Please *contact Donn Li Pera* of the Site Assessment and Mitigation Program, at (619) 338-2244, if you require additional assistance.

Sincerely,

GEORGE McCANDLESS, Program Manager
Supervising Environmental Health Specialist
Site Assessment and Mitigation Program

Case Closure Summary
Non-LOP or Voluntary Assistance Program

III. SITE CHARACTERIZATION AND/OR INFORMATION (Continued) H02377-009

Comments:

Case initiated by Kelco as a result of lease negotiations with the San Diego Port District for portions of Kelco's operations on Port land. Phase I and II investigations were conducted by different consultants for all the operations previously owned by Kelco.

A report prepared by England Geosystem, dated March 2003, summarizing the Phase I and Phase II investigations was submitted and identified three plants: Plant A and Plant B are algin operations and are now owned by ISP (International Specialty Products); Plant C is a biogum operation and co-generation plant currently owned by CP Kelco.

The DEH was asked to comment only on the Port lease property, which is south of Belt Street and represents Plants A and C.

Based on the Phase I and Phase II investigations, 29 areas were identified to be of environmental concern as a result of actual chemical contamination detected, or the potential for contamination from past or current chemical usage and storage. The DEH also identified chlorinated solvents as a potential onsite issue requiring additional evaluation. Areas investigated included:

Area	Description	Contaminants of Concern	Comments
1	Former 8000G Oil AST next to cooling towers	TPH, PAH's	Probable Bunker C. No VOC's detected.
2	Stained surface near cooling tower #1	no data	Staining assumed to be heavy oil.
3	Former 300G diesel AST and generator near cooling towers	TPH	Tank removed 1991 and closed 1992 with DEH oversight.
4	Stained concrete in compressor bldg.	TPH (oil), PAH's	TPH(Oil) only in soil, PAH's were not detected.
5	Former transformers with PCB's next to compressor bldg.	PCB's	EPA approved Kelco cleanup
6	Current chemical unloading station near bldg. L-15	TPH, VOC's	Low concentration of oils and PAH's detected no documented releases.
7	Former 35,000G diesel AST	No data	Installed 1969, removed 1973. No documented releases.
8	Former 81,000G, 20,000 and 15,000G calcium chloride and formalin AST's	Calcium chloride, formaldehyde	Tank located on concrete pad with no containment. Kelco personnel believed the tank may have leaked. Tank repaired, currently used as a waste water Equalization tank.
9	Former location of 7 AST's used for formalin, acid and ammonia, north of bldg. I-12	Formaldehyde, hydrochloric acid, sulfuric acid and ammonia	Low levels of formaldehyde (.41 mg/kg) only detected in soil.
10	Two or three former bunker C fuel UST's east side of bldg. K-13	TPH (oil), PAH's	Abandoned in place in 1967. TPH and TRPH not detected in 8 samples from 6 borings.
11	Former fuel unloading location between bldgs. I-14 and J15	TPH (various fuels)	No detected TPH in 2 samples from one boring.
12	Former 120G or 500G gasoline UST	TPH, VOC's	Tank removed in 1982. No significant TPH detected.
13	Former 5,000G sulfuric acid AST, current 1,500G sodium hypochlorite AST located west of bldg. J-15	Sulfuric acid, sodium hypochlorite	No soil samples collected.
14	Former 400G gasoline/fuel oil UST north of bldg. G-17	TPH (gas, oil), PAH's and VOC's	Removed June 1986 with the DEH oversight.
15	Oil stained concrete in machine shop	TPH (oil), PAH's	Minor staining no soil samples collected.
16	Two former oil AST's located south of the machine shop	TPH (oil), PAH's	Low levels of oil (13 mg/kg) detected in one of six samples from 4 borings.
17	Eleven former N,N-Dimethyl-formamide (DMF) and methanol AST's from 1,000 to 10,000G; one 68,000G diesel AST located west of bldg. F-12	DMF, Formaldehyde, methanol, TPH and PAH's	AST's removed 1982. No known releases.

Case Closure Summary
Non-LOP or Voluntary Assistance Program

III. SITE CHARACTERIZATION AND/OR INFORMATION (Continued) H02377-009

Comments continued:

Area	Description	Contaminants of Concern	Comments
18	Suspected former UST between bldgs. F-16 and G-17	No data	It was determined tank was not installed.
19	MT shop area, west end of bldg. F-16	Hydraulic oil, VOC's, PAH's inks	TPH not detected, low levels of PAH's detected
20	Possible stained surface	TPH (oil, diesel)	No soil samples collected due to auger refusal
21	Former location of two 12,000G formalin AST's in the area of the cogeneration plant	Formaldehyde	No known releases. Removed 1982.
22	Stained inside boiler bldg. F-12	TPH, diesel, Oil, PAH's	Stained concrete pad below non-operational pump.
23	Stained surface southwest of bldg. F-12	Oil, PAH's	Low levels of TPH and PAH's detected in soil.
24	Stained concrete former waste oil storage area east of bldg. F-12, also used to store petroleum based solvents	TPH (Oil), PAH's, VOC's	TPH not detected in all soil samples.
25	Stained concrete surface in tow motor shop east of bldg. F-12	TPH (oils), PAH's, VOC's	Forklift and facility equipment maintenance. Minor staining noted.
26	Former 550G lube oil AST and current lube oil AST	TPH (oil), PAH's	Tanks removed in 1992. No TPH or TRPH detected in soil.
27	Two former 500G diesel AST's	TPH, PAH's	Levels of TPH/TRPH as high as 15,700 mg/kg detected in soil.
28	Two current 5,000G formalin AST's former 5,000G sulfuric acid AST	Formaldehyde, sulfuric acid	Formaldehyde not detected in 3 samples from 2 borings.
29	Facility sewer and storm drain piping	Isopropyl alcohol, TPH, VOC's and PAH's	Prior to 1970, process wastewater was discharged to the bay. In 1970 all discharge water was re-routed to sewer. Video inspection of the sewer lines conducted in 1990. Repairs were made as needed.
30	Chlorinated solvents	Tetrachloroethene (PCE), 1,1,1-Trichloroethane (TCA) Trichloroethene (TCE) 1,1-Dichloroethane (DCA) cis-1,2-Dichloroethene (DCE)	England Geosystem concludes that chlorinated solvents detected in well OW-202 represent a release from Propulsion Controls at 1340 Sampson St. which is upgradient of Port Lease property; and solvents detected on Port Lease property were from use of aerosol cans, or paint-related solvents.

In their March 2003 report, England Geosystem requested that no further action be required for most areas listed above and the remaining areas be allowed to defer work. The request to defer work was based on the inaccessibility of the area due to the presence of structures and the low risk and mobility of the contaminant. Additional work was requested by the DEH for chlorinated solvents and another report was submitted by England Geosystem, dated October 2003. Based on the findings and conclusions of the England Geosytem reports the DEH concurs with their recommendations as follows:

- Require no further action for areas: 1, 2, 3, 4, 5, 6, 8, 9, 10, 11, 12, 14, 15, 16, 18, 19, 21, 22, 23, 25, 26, 27, 28 and 29;
- Defer investigation until current operations and infrastructure change for areas: 7, 13, 17 and 20.
- Require no bay sediment sampling.

  Bay sediment sampling was discussed but the DEH deemed it unnecessary as part of the investigation. Operations and chemical usage at the site do not appear to pose a threat to bay sediments and the cost of sampling and analysis seemed unwarranted.
- Require no further investigation of chlorinated solvents.

  Chlorinated solvents were detected in groundwater in areas 10, 12, 23 and 24 of the Port lease property. Kelco has no history of significant chlorinated solvent use. Solvents detected on Port lease property in groundwater are below action levels and determined to be from use of aerosol cans of solvents, or paint related solvents. These levels do not pose a threat to the Bay or public health.

  The highest concentrations of solvents were detected in wells OW-202 and OW-102, which are located on the up-gradient side of the property near Harbor Drive and is not Port lease property. The data suggests an offsite source, such as Propulsion Controls, where chlorinated solvents are used.

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

Case Closure Summary
Non-LOP or Voluntary Assistance Program

IV. CLOSURE

H02377-009

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan?	Yes
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan?	Yes
Does corrective action protect public health for current land use? Yes Case review based on current use as an industrial processing plant.	
Are there other issues DEH needs to follow up on: None	
Site Management Requirements: None	
Should corrective action be reviewed if land use changes? Yes	
List Enforcement Actions Taken: None	
List Enforcement Actions Rescinded: None	
Is this account up to date and current?: Yes

Telecom with Mr. John Rockefella and Larry Bodenhamer on July 30, 1992

RE: Southwest Marine bay sediments removal. H09689-001 *
Location: Sampson and Main street. Foot of Sampson Street.

Mr. Rockefella indication approximately 3000 yards of bay sediment will be dredged from San Diego Bay. The Sediments will be stockpiled, to dry, on shore to dry for 3 to 6 months. Mr Rockafella indicated the City of San Diego wants to have HMMD concurrance prior to issuance of a stockpile permit.
City of San Diego, requires a permit for stockpile due to contamination.
During the above telecom, Bodenhamer said the following:

1. Bodenhamer said all data will need to be reviewed.Mr. Rockefella indicated the sediments have tested as "not hazardous waste" He will forward all test data with request package.
2. Bodenhamer recommended to John that he send a completed HMMD assistance form and 160.00 to HMMD. Bodenhamer indicated he will need to send all reports and any other data acrewed so far. Bodenhamer said a work plan for stockpiling soil should be included with his submittal.
   Contact person with San Diego: (Bijan Shakiba 236-6778).
3. Bodenhamer promised to and did fax a copy of the HMMD assistance form for Mr. Rockafella to complete on 7-30-92.

8-3-92 Left message with Mr. Rockefellow explaining Dana Austin had already initiated project review w/HMMD. Asked him to call w/update.

RECORD OF TELEPHONE CONVERSATION

DATE: 5-12-92 TIME: 1000

REGARDING: SOUTHWEST MARINE - DREDGING PROJECT

TYPE: H75 SITE ID: H09689-001

PERSON CALLED: DANA AUSTIN PHONE NO: 238-1000 x2043

REPRESENTING: SOUTHWEST MARINE INC.

CONVERSATION: INTRODUCED MYSELF TO MR. AUSTIN AS HIS POINT OF HMMD CONTACT FOR THE DREDGING PROJECT. I INDICATED TO HIM THAT I HAD COMPLETED A REVIEW OF APPROXIMATELY ONE-HALF OF THE SUBMITTAL. i ASKED HIM WHY HE AND HIS CONSULTANTS HAD OPTED NOT TO ISSUE THE REPORT WITH CHAIN-OF-CUSTODY DOCUMENTS AND LAB DATA SHEETS. HE INDICATED THAT THE SAMPLES OBTAINED IN-SITU WOULD NOT BE USED TO CLASSIFY THE WASTE. INSTEAD, HE INDICATED THAT THE CONTAMINATED MATERIAL WOULD BE HANDLED AS STATED IN HIS NOTE TO THE ASSISTANCE APPLICATION FOLLOWING THE DREDGING OPERATIONS. FOLLOWING DEWATERING THE MATERIAL WILL BE SAMPLED AS A STOCKPILE ACCORDING TO CURRENT HMMD GUIDELINES. DISPOSAL OPTIONS WILL THEN BE EXPLORED. MR. AUSTIN SUPPLIED THE FOLLOWING TIMELINE:

DATE	PROPOSED ACTIVITY
PRESENT	AWAITING RESPONSE FROM ARMY CORPS OF ENG. ON DREDGING PROJECT
6-1-92	RECEIPT OF DREDGING PERMIT FROM ARMY CORPS OF ENGINEERS

Dear Mr. Allee:

As you know, Bechtel Environmental, Inc. (BEI) is assisting the EPA in assessing potential hazardous waste contamination at various abandoned sites and operating facilities. During our telephone conversation on July 12, you provided information regarding dredging operations at Southwest Marine, Inc. in San Diego.

Our contract with the EPA requires documentation of certain telephone conversations concerning the investigation. If a telephone conversation provides information that is important to our analyses, the EPA requires that we obtain concurrence on the accuracy of the information provided.

Attached for your review is a draft of the Contact Report documenting our telephone conversation. Please review it and make any changes you feel necessary. Please sign and date the form on the "Contact Concurrence" line and return the form to me as soon as possible with your comments in the self-addressed, stamped envelope provided.

I appreciate your assistance. If you have any questions, or wish to discuss this contact report further, please do not hesitate to call me at (415) 768-1098.

Sincerely,

Maynard Geisler

SUBJECT: Dredging at Southwest Marine, Inc.		
SITE NAME: Southwest Marine	EPA ID: CAD 981172554	

DISCUSSION:

Approximately 13,000 cubic yards of sediment were dredged from two areas near Pier 1 at Southwest Marine, Inc. The purpose of the dredging was to allow Southwest Marine, Inc. to accommodate larger ships. More dredging is planned in a few years. Approximately 5,000 cubic yards of the dredge material was disposed at an ocean dump site under permit by the US Army Corps of Engineers. The remaining 8,000 cubic yards of dredge material was dewatered and used as fill material under approval from the California Environmental Protection Agency, Regional Water Quality Control Board, San Diego Region.

Re: Required report in accordance with Monitoring Reporting Program No. 92-68, Sections B.4. through B.7.

Dear Brian,

During the 10th through the 12th of June, all 5000 Yd^3 of dredge materials, located at the Main St. Dewatering Site, were removed and used as fill. The final disposal location is in the 92073 Zip Code area (see attached map). There is no further material to be removed from the dewatering site and no additional water was removed from these sediments, during the month of June. Should you have any questions or require additional information regarding this report, please call me at (619) 238-1000, ext. 4907.

Sincerely,

Daniel G. Mills

Semivolatiles-PNAs	N/A	trace	N/A	trace	Other	N/A	N/A	N/A	N/A

Comments (Depth of Remediation, etc.): During soil sampling for the tank closure in place, contamination was observed in the area of the former dispenser. 8 borings were drilled during the initial assessment to determine if there was a release. The concentration of total petroleum hydrocarbons was observed to be over 44,000 mg/kg in the weathered diesel range. Six additional borings were drilled in the area of the former dispenser and 4 groundwater samples were obtained to complete the assessment. The consultant estimates that less than 10 cubic yards of hydrocarbon impacted soil is present at a depth of 5 to 13 feet in the vicinity of the former dispenser. The presence of the contamination based on the current site use does not present a significant threat to human health or the environment according to the consultant. The most volatile component of diesel, naphthalene, has a maximum soil concentration of <.002 ppm and is not likely to produce any vapors. The Organic Vapor Monitor (OVM) reading for the boring B-9 adjacent to the contamination was ND for all three samples taken at different depths. The consultant has concluded the contamination by the dispenser is not related to the underground storage tank system. The data submitted to this office by the consultant does not validate this statement and is not relevant to this closure summary. The residual concentrations of contaminants remaining meets the April 1, 1996 guidance for protection of the bay issued by the Regional Water Quality Control Board.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes

Does corrective action protect public health for current land use? Yes
Case oversight completed based upon the current site use as a solid waste storage area.

Site Management Requirements:

Any contaminated soil excavated as part of subsurface construction work must be managed in accordance with the legal requirements at that time.

Should corrective action be reviewed if land use changes? Yes

RWQCB REFERRAL - CASE NO. H09689-003
SOUTHWEST MARINE
2205 EAST BELT STREET FOOT OF SAMPSON STREET
SAN DIEGO, CA 92170-3308

Evidence of a hazardous substance release has been reported to the County of San Diego, Site Assessment and Mitigation Program (SAM) by Mr. Kenneth Peterson, Southwest Marine, Inc., on October 3, 2002. I am referring this case to you for follow up. The property owner is Southwest Marine Inc., P.O. Box 13308, San Diego, CA 92170-3308, (619) 238-1000. The Department of Environmental Health (DEH) requests the Regional Water Quality Control Board take whatever action is deemed appropriate for the site.

The suspected source or amount of the release is unknown. The release was detected by a phase II site assessment. Copies of the notification letter, site assessment report, and SAM response are enclosed for your information.

If you have questions or comments, please contact Danny Martinez at (619) 338-2456.

Sincerely,

JACK MILLER, Chief

RE: UNAUTHORIZED RELEASE #TO322/H13942
1348 SAMPSON STREET, SAN DIEGO, CA

Dear Mr. Dawsey:

The site remediation report submitted to this Department by SDG&E, Woodward Clyde Consultants and Crosby Overton summarizing the site characterization and mitigation activities at the above referenced location has been reviewed. This report has also been discussed with staff of the Regional Water Quality Control Board (RWQCB). The RWQCB concurs with the determination of this Department that this site has been adequately mitigated. Based on current requirements and policies, no further action is indicated at this time.

Please be advised that if the current use of the site changes, additional site characterization and mitigation activity may be required. As the property owner, it is your responsibility to notify this Department prior to any such changes.

Thank you for your efforts in resolving this matter. Please contact the Hazardous Materials Management Division at (619) 236-2222, if you require any additional assistance.

Sincerely,

GARY R. STEPHANY, Deputy Director
Environmental Health Services

UNAUTHORIZED RELEASE # H13942-002
SDG&E ENVIRONMENTAL DEPT.
1348 SAMPSON, SAN DIEGO, CA
Global ID: T06019761425

On July 24, 2006, an unauthorized release case was opened on the above listed property by the County of San Diego, Department of Environmental Health (DEH), in accordance with the California Health and Safety Code and the California Code of Regulations. The DEH Site Assessment and Mitigation Program (SAM) provided oversight of the above mentioned release until December 5, 2013.

For all future questions related to this release, please contact Craig Carlisle of the Regional Water Quality Control Board (RWQCB) at (619) 521-3378 or at Craig.Carlisle@waterboards.ca.gov by electronic mail. All of the files held by the SAM have been transferred to the RWQCB. No copies have been retained by SAM. Requests for public records review pertaining to unauthorized release #H13942-002 will be addressed by the Regional Water Quality Control Board at (619) 516-1990.

Sincerely,

SCOTT WELDON
Supervising Environmental Health Specialist
Site Assessment and Mitigation Program

PAST DUE NOTICE

May 11, 2012

Barbara Montgomery
Project Manager, Environmental Services
Sempra energy Utilities
8315 Century Park Ct., CP2IE
San Diego, CA 92123-1548

Dear Ms. Montgomery:

UNAUTHORIZED RELEASE FILE #H13942-002
SILVERGATE POWER PLANT
1348 SAMPSON STREET, SAN DIEGO, CA

This letter has been prepared in accordance with the requirements set forth in Title 23 (State Underground Storage Tank Regulations), Division 3, Chapter 16, Article 11.

A review of the Department of Environmental Health (DEH), Site Assessment and Mitigation Program files indicates that the written update report associated with the site clean-up at above-referenced location is **PAST DUE**. DEH has not received a report on the progress of your environmental work at the subject site.

The California Code of Regulations, Title 23, Division 3, Chapter 16, Article 5, Section 2652(d) states that until cleanup is complete, reports shall be submitted to the local agency every three months or at a more frequent interval if specified.

Submit a written update report to DEH by Wednesday July 11, 2012, summarizing all site activities and any proposals for further work. Update reports must be submitted until such time as the unauthorized release is resolved.

If you have any questions, please contact me at 858-505-6795.

Sincerely,

NASSER SIOMIT, Project Manager
Site assessment and Mitigation Program
Department of Environmental Health

JACK MILLER
ASSISTANT DIRECTOR

July 2, 2008

Mr. Ron Halik
CP Kelco
2025 East Harbor Drive
San Diego, CA 92113

Dear Mr. Halik:

VOLUNTARY ASSISTANCE PROGRAM, FILE H38979-002
CP KELCO, LOCATED AT 2025 E. HARBOR DRIVE, SAN DIEGO, CA
FORMER IPA AND DIESEL TANK FARM

The Department of Environmental Health (DEH), Site Assessment and Mitigation Program (SAM), reviewed the environmental investigation report related to the above-referenced property, prepared by E2 Environmental. The report summarizes the site investigation activities performed at the above-referenced location. Provided that the information presented to DEH/SAM was complete, accurate, and representative of existing site conditions, **this agency concurs that the cleanup goals established for the subject site have been met.**

Please be advised that this letter does not relieve the responsible party of any liability under the California Health and Safety Code or the Porter Cologne Water Quality Control Act.

Currently remaining in the area of the investigation is the concrete covered dirt berm that surrounded the former aboveground tanks; and the adjacent unloading area with asphalt and concrete paving. Changes in the present use of the above site as an open area on the Industrial facility may require reevaluation to determine if the change will pose a risk to public health.

Thank you for selecting the Department of Environmental Health as your lead agency to assist you with the progress of your environmental project. Please contact Donn LiPera of the Site Assessment and Mitigation Program, at (619) 338-2244, if you require additional assistance.

Sincerely,

GEORGE McCANDLESS, Program Manager
Supervising Environmental Health Specialist
Site Assessment and Mitigation Program

I. AGENCY INFORMATION

DATE: 7/1/2008

Agency Name: County of San Diego, Environmental Health, SAM	Address: P.O. Box 129261
City/State/ZIP: San Diego, CA 92112-9261	Phone: (619) 338-2222 FAX: (619) 338-2377
DEH Staff Person: Donn LiPera	Title: Project Manager

II. CASE INFORMATION

Case No. H38979-002		
Site Name: CP Kelco		
Site Address: 2025 E. Harbor Drive, San Diego, CA 92113		
Property Owner: CP Kelco	Address: 2025 E. Harbor Drive, San Diego, CA 92113	Phone: 619 595-5065 Ron Halik
Responsible/Requesting Party : CP Kelco	Address: 2025 E. Harbor Drive, San Diego, CA 92113	Phone: 619 595-5065 Ron Halik
Type of Case: Non-Tank Case		
RWQCB/DTSC notification of DEH Oversight: yes 10/23/2001		

III. SITE CHARACTERIZATION AND/OR INFORMATION

Cause and Type of Contamination (if any): Four above-ground storage tanks each 275,000 gallons: 3 diesel, 1 isopropyl alcohol (IPA)

Site Characterization complete?	Yes			
Monitoring Wells Installed?	Yes*	Total Number: 16	Proper Screened Interval? Yes	Number of decommissioned wells: 0
Range of groundwater levels on the site? 10-15 feet below grade.				Groundwater Flow Direction: South

Most Sensitive Current Use:

Beneficial Groundwater Use: None Designated
Existing Beneficial Surface Water Use: REC2 and Potential: REC1

Are Drinking Water Wells Affected?	No	RWQCB Basin Number: Chollas Hydrologic Sub Area 908.22	
Is Surface Water Affected?	No	Nearest Surface Water name: San Diego Bay	

Off-Site Beneficial Use Impacts (addresses/locations): None

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL

Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Purge water	1 drum	Safety Kleen Systems, Texas	12/29/2006
Purge water	1 drum	U.S. Ecology, Nevada	9/14/2007
Soil cuttings	1 drum	Safety Kleen Systems, Texas	12/29/2006

Non-LOP - Underground Storage Tank Oversight handled outside the LOP
Non-Tank – Voluntary Assistance Program

Case Closure Summary
Non-LOP or Voluntary Assistance Program

1,3,5-Trimethylbenzene	0.100	0.100	**	**				**	**

Comments:

The area investigated was a former tank farm used by Kelco that consisted of four above-ground storage tanks, each with a storage capacity of 275,000 gallons surrounded by a 4 foot high soil berm covered with gunite and a dirt floor. Three tanks stored diesel fuel and one of the tanks was used for isopropyl alcohol (IPA). The IPA tank was removed in 1992 and the diesel tanks were removed in 2001.

Currently remaining is the containment berm (breached on the south side) with dirt floor and the adjacent former loading area with asphalt and concrete paving. No current plans to change the use of the area have been proposed.

The consultant concludes:

- Most of the contamination is from diesel fuel and is located inside the concrete containment berm from ground surface to 5 feet below grade.
- A smaller area of diesel impacted soil exists in the loading area just east of the concrete containment berm from ground surface to 3 feet below grade.
- A small amount of IPA and semi-volatile organic compounds were also encountered in both areas.
- The IPA is associated with the former IPA tank and the semi-volatile organic compounds, such as naphthalene, are associated with the former diesel tanks.
- Groundwater does not appear to be impacted by the release.
- The only chemical detected in the groundwater sample collected from well MP-106 was a trace amount of DCE, but it is not significant and is below action levels.
- No further investigation is warranted and natural attenuation of the contaminants in soil is the only mitigation needed.
- Additional assessment and/or mitigation may be required should the use of the area of investigation be changed.

The DEH agrees with the consultants' conclusions and recommendations.

** A water sample was collected from well MP-106, located just south of the tank farm. Chemicals were not detected by EPA Method 8260B using acceptable method detection limits with the exception of a trace amount of cis-1,2-DCE (0.97 micrograms/liter).

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes

Does corrective action protect public health for current land use? Yes

Case review based on current use as: Industrial (former tank farm with concrete containment and dirt bottom; and adjacent unloading area with asphalt and concrete paving.)

Case Closure Summary
Non-LOP or Voluntary Assistance Program

IV. CLOSURE (cont.) H38979-002

Are there other issues DEH needs to follow up on: None
Site Management Requirements: Any impacted soil excavated for reuse onsite or offsite disposal must be managed in accordance with the legal requirements at that time.
Should corrective action be reviewed if land use changes? Yes
List Enforcement Actions Taken: None
List Enforcement Actions Rescinded: None
Is this account up to date and current?: Yes

V. LOCAL AGENCY REPRESENTATIVE DATA

Name: Tony V. Sawyer PG 4345, CHg 40	Title: Hydrogeologist Land and Water Quality Division
Signature: Tony V. Sawyer	Date: 4-3-08

VI. RWQCB NOTIFICATION

Date Submitted to RWQCB: N/A VAP Case	RWQCB Response: N/A	
RWQCB Staff Name:	Title: N/A	Date: N/A

VII. ADDITIONAL COMMENTS, DATA, ETC.

*Well MP-106, installed for closed case #H02377-009, was used for monitoring purposes for this case. The wells from the closed case, including MP-106, were retained by Kelco to monitor groundwater conditions. A letter committing to maintenance, monitoring and reporting was submitted.

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR Inquiry # 4069684.3

Contact: Adrian Olivares

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. *Further reproduction of these aerial photo images is prohibited without permission from EDR. For more* information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

APPENDIX F

VAPOR ENCROACHMENT SCREENING MATRIX

63732 PAGE 2375

Phase I ESA Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern Test (COC), and (3) a Critical Distance Test [1].

(1) Search Radius Test: Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii?

☒ Yes ☐ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(2) Chemicals of Concern Test: Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☒ Yes ☐ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(3) Critical Distance Test: A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

☒ Yes ☐ No — (3a) Is information related to the contaminated(s) plume available (i.e. isoconcentration maps, site drawings, etc.)?
(3b) If ***No***, then a VEC cannot be ruled out; check ***Yes*** in #4 below indicating it is likely a VEC exists. If ***Yes***, then:

☒ Yes ☐ No — (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

☒ Yes ☐ No — (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

(4) Is it likely that a VEC *currently* exists beneath the site?

☒ Yes ☐ No — If ***No***, then the VEC screening is complete and no further investigation is recommended at this time. If ***Yes***, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.

EXPERIENCE HIGHLIGHTS

City of San Diego, As-Needed Environmental Services Site Assessment and Mitigation Process Contract
Crossroads College Project Areas EIR
Otay Truck Route
SDG&E Tidelands Area

As a Senior Project Environmental Scientist for Ninyo & Moore, Mr. Olivares manages and conducts Phase I and Phase II Environmental Site Assessments (ESAs), Caltrans Initial Site Assessments (ISAs), California Environmental Quality Act (CEQA) hazardous materials technical studies for Environmental Impact Reports (EIRs), and related due diligence and environmental history investigations. Mr. Olivares performs all phases of environmental investigations, coordinates and observes subsurface drilling activities, conducts investigations of subsurface contamination and logging of exploratory borings, conducts groundwater monitoring utilizing a variety of methods, authors reports, and interfaces with regulatory agencies.

REPRESENTATIVE PROJECT EXPERIENCE

As-Needed Environmental Services Site Assessment and Mitigation Process Contract, San Diego, California: Project Manager for this five-year contract awarded to Ninyo & Moore, which includes conducting environmental site assessments at contaminated, City-owned properties throughout the County of San Diego. Scope of services include: work plan and health and safety plan preparation, field investigations (drill, sample, analytical testing), human health risk assessments, groundwater monitoring and sampling, and report preparation including corrective action plans and site conceptual models. The purpose of the contract is to assist the City of San Diego in obtaining regulatory agency closure of its properties that have been affected by unauthorized releases from underground storage tanks (USTs).

Otay Truck Route, San Diego, California: Project Manager prepared an ISA for the Otay Truck Route Improvement Project in San Diego County, California. The area evaluated for this ISA was generally bounded by Siempre Viva Road to the north, Customhouse Court to the east, the international border to the south, and Britannia Boulevard to the west in the community of Otay Mesa, within the City and County of San Diego, California. The purpose of the project was to provide the construction of additional travel lanes to the existing truck route for truck traffic entering the Otay Mesa Border Crossing Port of Entry (POE) and to provide a travel lane for Border Patrol and emergency vehicles. The ISA involved evaluation of properties within the boundaries of the project area and off-site properties, which have the potential to negatively impact the project area.

13th Street Bridge, Ramona, California: Project Manager prepared an ISA for the 13th Street Bridge Project in Ramona, California. The ISA involved evaluation of 11 parcels within the boundaries of the project area and project area vicinity, which have the potential to negatively impact the project area. Three bridge alternative routes were evaluated within the project area with varying degrees of impacts to the 11 parcels comprising the project area. The purpose of the ISA was to document, to the extent feasible, Recognized Environmental Conditions (RECs), which are defined by the ASTM International (ASTM) Standard Practice E1527-05.

Metropolitan Transit System, 13th Street Light Rail Vehicle Maintenance Facility and Newton Avenue Taxi Inspection Facility San Diego, California: Project Manager for the implementation of the facility's Storm Water Pollution Prevention Plan (SWPPP). The project included wet and dry season monitoring, sampling, an annual inspection for the comprehensive site compliance evaluation for potential pollutant sources, and reporting to comply with the facility's Regional Water Quality Control Board industrial storm water permit requirements.

REPRESENTATIVE PROJECT EXPERIENCE (continued)

City of San Diego, Southeastern San Diego Community Plan Update, San Diego, California: Project Manager for the preparation of a Hazardous Materials Technical Study (HMTS) for the comprehensive update of the Southeastern San Diego Community Plan. The purpose of the HMTS was to document the presence of properties, which may have been impacted by hazardous materials or wastes, and to document the significance of impacts from the project area with respect to CEQA, and to discuss measures that can be implemented to reduce or mitigate the potential impacts.

Crossroads College Project Areas EIR, San Diego, California: Senior Staff Environmental Scientist for an HMTS for the College Grove Redevelopment Project. This area is one of five "Component Areas" of the merged "Crossroads Redevelopment Area." In completing the HMTS, Ninyo & Moore services included review of maps, reports, and other environmental documents pertaining to the project area; performance of a site reconnaissance of the study area to visually identify possible environmental concerns; review of available regulatory agency databases for the project area and for properties located within a specific radius of the project area; review of available historical aerial photographs for the project area and adjacent properties; and preparation of an HMTS report documenting findings and providing opinions and recommendations regarding possible environmental impacts at the project area.

Centre City Development Corporation (CCDC), 1625 Newton Avenue, San Diego, California: Project Environmental Scientist for the preparation of an ASTM International E1527-05 and All Appropriate Inquires (AAI) compliant Phase I ESA including a site reconnaissance, agency file review, environmental database search, and historical records search for the property located at 1625 Newton Avenue in downtown San Diego, California. Based on the findings and recommendations of the Phase I ESA, Ninyo & Moore recommended and performed a soil vapor survey and human health risk assessment to evaluate potential health risks to building occupants.

Multiple Geothermal Power Plants, Imperial Valley, California: Project Environmental Scientist for preparation of regulatory compliance documents including: California Accidental Release Plan (CalARP); EPA Risk Management Plan (RMP); OSHA Process Safety Plan (PSM); Spill Prevention, Control, and Countermeasure Plan (SPCC); and Hazardous Materials Business Plan (HMBP). Responsibilities included the inspection of facilities, client and regulatory interaction, and coauthoring of reports.

SDG&E Tidelands Area, Subsurface Investigation, San Diego, California: Senior Staff Scientist provided field support for soil, groundwater and sediment investigation at the property. Ninyo & Moore's services included preparation of a soil/groundwater/sediment sampling and analysis plan; preparation of a site-specific health and safety plan; field services including the advancement of Cone Penetration Testing (CPT)/Ultra Violet Optical Screening Tool (UVOST) at 38 locations to depths of 40 to 48 feet below ground surface (bgs) and at 28 locations, used a direct push drill rig to collect soil samples at depths associated with selected UVOST data, set temporary wells at 15 locations, collected groundwater samples, and collected sediment samples from the interior base of the sea water cooling tunnels located beneath the site; compiled and performed a quality control review of the analytical results; and prepared a report summarizing the subsurface investigation.

Mr. Beck's project experience includes soil, soil vapor, sediment, sludge, surface water, groundwater and soil vapor surface and subsurface site assessments, hazardous building materials, human health and ecological risk assessments, remedial design, and remedial/removal actions involving volatile and semi-volatile organic compounds, polychlorinated biphenyls, metals, refined petroleum products, and pesticides, underground storage tanks, radiological surveys, and various phases of hydrologic/groundwater supply projects. Other experience includes site assessment investigations for real estate transfers, including Navy property, school sites, power and coal gasification plants, Brownfields, pipeline, transportation and railroad rights-of-way, regulatory compliance involving U.S. Environmental Protection Agency, California Department of Toxic Substances Control, California Fish and Game Department, Regional Water Quality Control Board, Department of Health Services, Air Pollution Control District, California Integrated Waste Management Board, State Water Resources Control Board, and California Coastal Commission, environmental construction management services, characterization at NPL sites, RCRA, SARA, CERCLA, TSCA, CWA, SWDA, and CIWMB projects, technical studies for inclusion in CEQA/NEPA documents, preliminary endangerment assessments, expert witness and litigation support, enhanced oil recovery projects, and extensive drilling in the U.S. and abroad.

REPRESENTATIVE PROJECT EXPERIENCE

Metropolitan Transit Development Board, On-Call 5-Year Environmental Services Contract, San Diego County, California Contract Manager and Principal Environmental Geologist for this on-call contract. Mr. Beck's services have included third party review, regulatory liaison, site assessments, permitting, stormwater compliance, construction management services, hazardous materials management and disposal, and lead and asbestos abatement oversight. Most recently, Mr. Beck has been integrally involved in the Mission Valley East Light Rail Extension project, providing critical senior technical expertise and quality review on stormwater pollution prevention protocols.

San Diego City Schools, As Needed Environmental Consulting Services Contract, San Diego, California: Principal-in-Charge, Technical Advisor, and QA/QC Manager for Phase I Environmental Site Assessments (ESA) at 13 proposed and existing elementary, middle, and high school sites within the jurisdiction of the San Diego Unified School District (SDUSD). The proposed sites included properties with existing commercial, industrial, and residential land uses. Phase II ESAs were also conducted on 9 existing SDUSD school sites and 2 proposed SDUSD school sites. Mr. Beck also provided technical input and report preparation assistance regarding implementation of Remedial Action Workplans at several of the sites to cleanup lead and organochlorine pesticides in soil. This work was performed under the direction of the California Department of Toxic Substances Control.

County of San Diego Burnsite and Landfill Engineering Services As-Needed Contract, Various Locations, San Diego County, California: Principal-in-Charge and Technical Advisor for an on-call environmental services to the County of San Diego Department of Public Works as part of its three year, $500,000, Burn Site and Landfill Engineering Services As-Needed Contract. The general scope of work for this contract focuses on conducting investigations and remedial action at County inactive solid waste disposal sites, most of which are former burn sites. The specific engineering services required by the County include characterizing and delineating former burn sites; preparing landfill closure and post-closure maintenance plans; preparing construction plans, specifications, and cost estimates for landfill maintenance projects; implementing remedial action plans, preparing of health and safety plans; value engineering; and assistance during the bidding process for construction activities.

REPRESENTATIVE PROJECT EXPERIENCE (continued)

Centre City Development Corporation (CCDC), On-call Environmental Consulting Services Contract, San Diego, California: Contract Manager and Principal Environmental Geologist on this on-call contract. Our services on this contract in the past years have included performing Phase I and Phase II Environmental Assessments on Downtown San Diego properties slated for purchase and redevelopment, third-party review of environmental consultants reports, and development and implementation of soil management protocols on construction sites within the CCDC jurisdiction. Mr. Beck performed complex third-party reviews and acted as Technical Liaison for the CCDC, working with stakeholders and regulators on complex urban redevelopment projects. As an example, Mr. Beck authored and has helped to implement the conclusions of a hazardous materials constraints analysis as part of the Downtown Community Plan Update and Master Environmental Impact Report. The analysis presented a summary of current downtown San Diego redevelopment trends in hazardous materials management from a regulatory and practical perspective, suggested methods that have proven effective in the identification, assessment, and mitigation of environmental issues, and provided general conclusions regarding the potential impact of hazardous materials releases on redevelopment in the 1500 acre downtown area. Mr. Beck was commended by the CCDC and other key downtown stakeholders for this concise and technically sound planning document.

San Diego Unified Port District, San Diego, California: Since 1994, Mr. Beck has been Program Director, Project Manager, Technical Advisor, and QA/QC Manager on numerous Port District on-call site assessment contracts involving Phase I due diligence, Phase II investigation, National Contingency Plan, Preliminary Endangerment Assessment, Remedial Investigation, Feasibility Studies, Risk Assessment, Public Participation Plans, Remedial Action Plans, NEPA/CEQA studies, and dealing with regulatory compliance issues and public concerns. Mr. Beck's involvement on such projects as the San Diego Convention Center Expansion and the Naval Training Center Landfill, has led to the swift and successful completion of these high profile, environmentally sensitive projects. Mr. Beck continues to provide technical input, QA/QC management, and regulatory liaison and negotiation for the former Campbell Shipyard remediation (landside and sediment), the East Parking Lot remediation of coal gasification wastes, the Tow Basin PCB remediation, and the assessment of contamination at the future Spinnaker Hotel site.

San Diego County Regional Airport Authority (SDCRAA) On-Call Services Agreement, San Diego, California: Principal Environmental Geologist for this contract, provided technical input and services to SDCRAA regarding environmental issues pertaining to airport operations, maintenance, construction, and expansion.. Mr. Beck also is Principal Environmental Geologist and Contract Manager for the environmental constraints study for the final alternative sites that will considered as potential locations for either a new airport or the expansion of existing facilities.

California Integrated Waste Management Board (CIWMB) Closed, Illegal and Abandoned Disposal Site Investigation Program, Various Locations, California: Principal-in-Charge and Technical Advisor for the Closed, Illegal and Abandoned (CIA) Site Investigation Program. This contract includes subsurface investigations of illegal disposal sites, solid waste disposal and co disposal sites where further site characterization is necessary for monitoring, enforcement action, or site cleanup. Investigations have included excavating and logging trenches and test pits and drilling borings to characterize subsurface materials, delineation of the extent of burned wastes or other buried wastes to evaluate recommended remedial action. The disposal site projects have all been sites where there has been an identified potential risk to human health and the environment.

NTC Inactive Landfill, San Diego, California: Principal-in-Charge and Technical Advisor for the Naval Training Center Inactive Landfill. The project involved identifying, delineating and characterizing buried wastes, a geotechnical investigation, evaluating remedial action alternatives, providing cost estimates for implementing corrective action, extensive interfacing with the client, RWQCB, CIWMB and other agencies, and presentation of data at various meetings and to technical advisory boards. A subsequent subsurface investigation to delineate the extent of burned wastes within the site and in outlying areas and to characterize the burn material in accordance with LEA requirements. Principal reviewer of the remedial action plan to clean close the site by removing the wastes and affected media.

Chula Vista Bayfront Master Plan EIR, Chula Vista, California: Principal Environmental Geologist for a hazardous materials technical study (HMTS) for the Chula Vista Bayfront Master Plan. The technical report will be utilized in the preparation of an Environmental Impact Report (EIR), and is not intended for the purpose of design or construction. The project area consists of a number of parcels along the bayfront in the city of Chula Vista, California totaling approximately 550 acres under the ownership and jurisdiction of the San Diego Unified Port District (Port), including land acquired from B.F. Goodrich, vacant and underutilized areas, and the existing South Bay Power Plant parcel. Mr. Beck's services included review of maps, reports and other environmental documents pertaining to the site; review regulatory agency databases for the site and for properties located within a 1,000-foot radius of the project area; and review of a HMTS report documenting findings and providing opinions and recommendations regarding possible environmental impacts to the project area.
