

PORT OF SAN DIEGO H1 CY2026 TRUCK REPORT

Published September 2026

Truck Movements Summary

Truck Visit Totals

	All Cargo Terminals	TAMT	NCMT
H1 (Jan.-June 2026)	36,053	25,414	10,639

Notes:

1. TAMT = Tenth Avenue Marine Terminal; NCMT = National City Marine Terminal
2. Only visits from Class 7 and 8 cargo trucks are reported.
3. A truck visit is defined as one instance of a truck's entry onto a cargo terminal.

Truck Visits by Fuel Type

	H1 (Jan.-June 2026)	
Fuel Type	No. Visits	%
Diesel	35,556	98.6%
CNG/LNG	431	1.2%
Battery Electric	66	0.2%
All Visits	36,053	100%

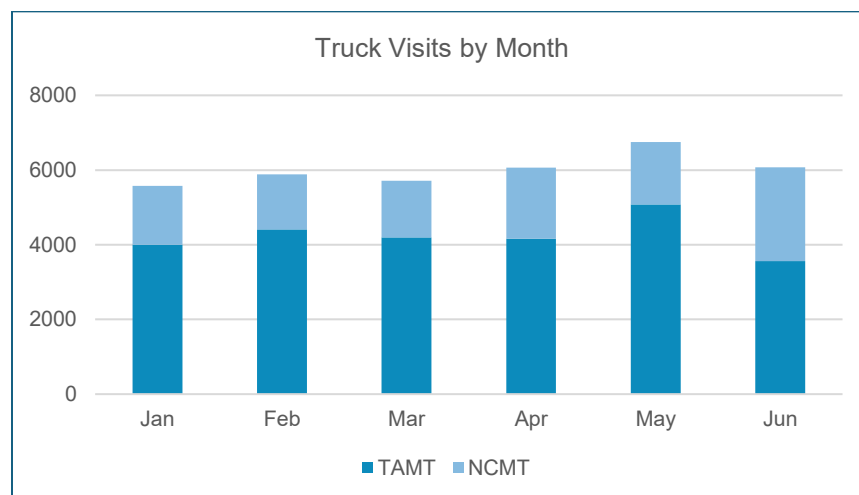

Notes: CNG = compressed natural gas; LNG = liquefied natural gas.

Truck Summary: Numbers of Unique Trucks Visiting Terminals

	All Cargo Terminals	TAMT	NCMT
Class 7	86	41	49
Class 8	1,956	1,177	825
Diesel	2,020	1,198	870
CNG/LNG	19	17	4
Battery Electric	3	3	0
Total	2,042	1,218	874

Note: 50 trucks visited both terminals.

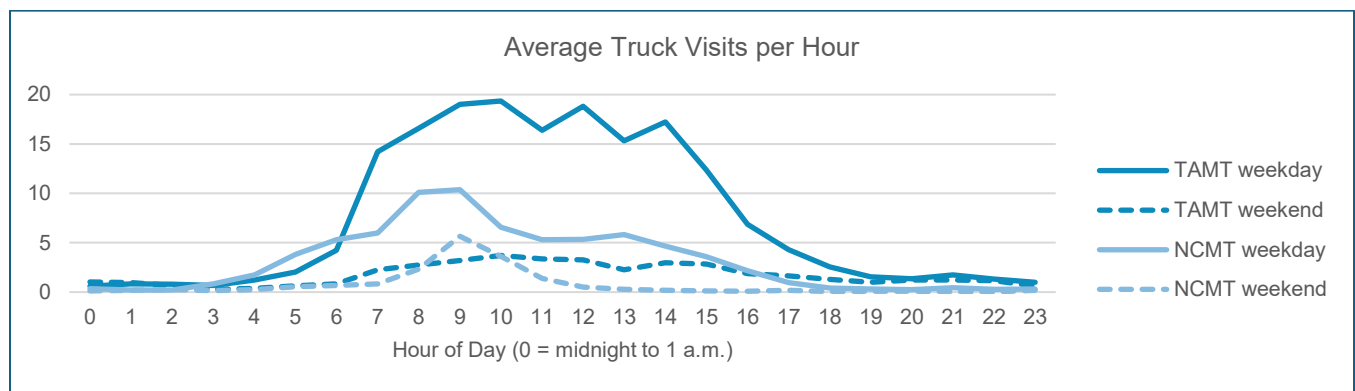

Truck Traffic Characteristics

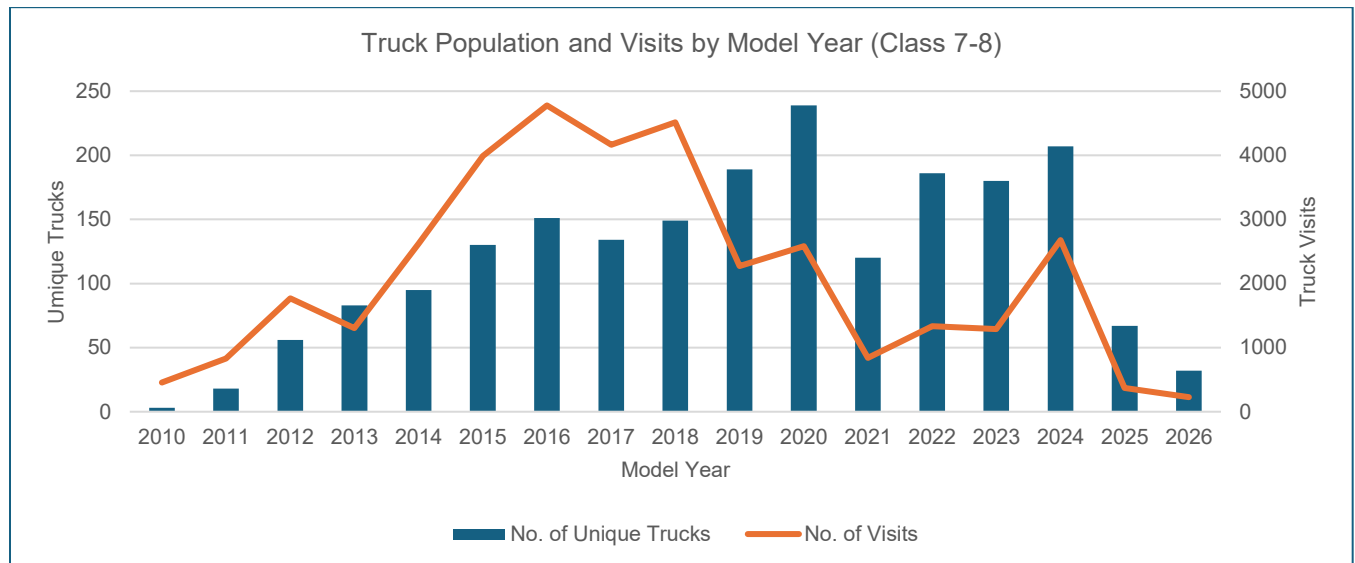

PORT OF SAN DIEGO H1 CY2026 TRUCK REPORT

Note: The average number of daily truck visits on weekdays is 256 for both terminals combined, and the average on weekends is 59.

Truck Population Characteristics

Notes:

1. The average model year of the truck population is 2019.
2. Weighted by truck visits, the average model year is 2017.
3. Because of the relatively small quantities, 3 trucks with model years of 1999 and 2007 that made 33 visits were not included in the graph above.
